

Flow and thermal solution for quick and accurate feedback on product design performance

“Your CAE Partner for Success”

CATIA MD2

Coreq	Prereq	GPS
		EST

STAR CAT5

For engineers and CFD analysts

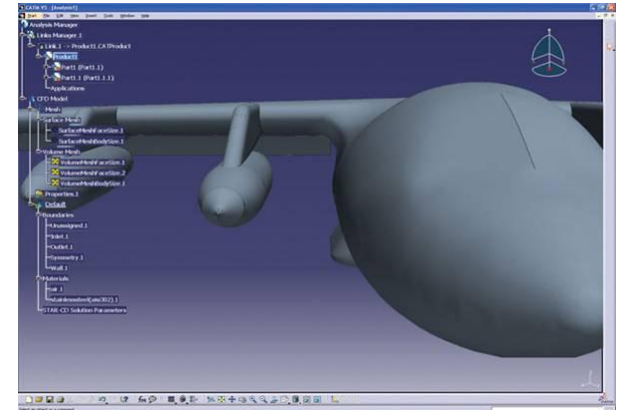

- Process-centric flow and thermal simulation
- Evaluate “what-if” design scenarios quickly AND easily
- Intuitive menu system to guide through simulation process

No compromises: get more accurate results faster!

- Polyhedral technology is more accurate, faster, more robust and efficient than tetrahedral

Full-spectrum CAE software and services

- One licensing option of STAR-CAT5 has the ability to drive CD-adapco’s advanced CFD software
- Engineering services are also part of the solution to help customers solving their engineering challenges

Targets

- Automotive, Aerospace, Biomedical, Defense & Government, Chemical Process, Turbomachinery, Electronic devices, Oil and gas, Power Generation, ...

Customer Benefits

- Flow and thermal insight within PLM environment
- Best-in-class, proven and reliable underlying technology
- Scalable offering to meet customers current and evolving needs
