

Academia: The new brochure has arrived!

A rich interdisciplinary platform presenting Dassault Systèmes PLM software, this document is a must-have.

PLM Discover is a single integrated package combining many capabilities such as virtual design, digital manufacturing, realistic simulation and collaborative innovation.

The “Master and Advance” on demand specializations, addressing all levels and specialized skill categories expected by employers, have been developed in partnership with universities and actors to best meet employer expectations.

The Beyond PLM section provides additional information about 3DVIA/EXALEAD/3DSWYM/DRAFTSIGHT.

Dassault Systèmes solutions facilitate learning, teaching and give engineering students professional skills.
