

Optimize your investment in DS PLM software with learning solutions from DS

DS PLM solutions help you to turn innovative ideas into market-leading products getting quicker to the Market.

In having DS University collaborating with you, you gain access to:

- Our recommended methodology, best practices and tools
- Optimized and efficient training solutions based on award winning DS learning technologies
- A worldwide network of certified experts and instructors who work very closed to our software developers.

Only DS can offer you comprehensive end-to-end training solutions which are always at the state of the art.

About Dassault Systèmes

As a world leader in 3D and Product Lifecycle Management (PLM) solutions, Dassault Systèmes brings value to more than 115,000 customers in 80 countries. A pioneer in the 3D software market since 1981, Dassault Systèmes develops and markets PLM application software and services that support industrial processes and provide a 3D vision of the entire lifecycle of products from conception to maintenance to recycling. The Dassault Systèmes portfolio consists of CATIA for virtual product design - SolidWorks 3D for Professionals - DELMIA for virtual production - SIMULIA for realistic simulation - ENOVIA for global collaborative lifecycle management, and 3DVIA for online 3D lifelike experiences. Dassault Systèmes' shares are listed on Euronext Paris (#13065, DS4.PA) and Dassault Systèmes' ADRs may be traded on the US Over-The-Counter (OTC) market (DAST4).

MAXIMIZE YOUR PERFORMANCE

Your staff + DS university =
your corporate learning program

Keeping staffs trained and up to date on PLM solutions has always been a challenge. One time training without constant upgrading of skill sets significantly reduces productivity. Scheduled maintenance upgrades, version enhancements, new technologies, and process changes necessitate a constant and monitored training program to keep engineers' skills consistent with evolving applications. DS University's training program provides continuing education through their e-learning offering. Additionally, testing and certification programs insure that engineers are up to date and competent with the latest versions. Moreover, companies can easily build custom training courses and design curriculum to fit their specific needs. DS University clearly provides these abilities.

Dick Slansky

Senior Analyst, PLM Research Director

THE TRAINING PAYBACK

Training class + e-learning = the perfect match

// The blended learning approach has recently been used during the O2M Program, a European project involving 33 companies from the automotive industry. More than 100 mechanics and electronics Engineers are developing together new solutions to improve mechatronics and multi-physics modeling tools in the automotive domain.

A customized training program was developed by DS for all 33 companies of the O2M project, based on the Companion eLearning courses. The main benefit of this approach was to easily use the same content during and after class for additional learning, testing and evaluation. DS provided us with a collaborative and continual online learning environment, which allowed all the mechanics and electronics engineers attending the program to quickly become skilled on the same versions of the DS Solutions for better productivity on the O2M Program. //

Denis Barbier - PLM Program Manager- Valeo Group R&D

4 LEARN WITH OUR CERTIFIED INSTRUCTORS

3 CUSTOMIZE OUR EXTENSIVE COURSEWARE PORTFOLIO WITH YOUR WORK PROCESSES AND METHODS

2 DEFINE YOUR LEARNING PATHS FOR VARIOUS ROLES THAT MAY PLAY IN YOUR ORGANIZATION

Tailored material adapted to your Corporate Learning Program

DS helps you to design and build a complete learning program based on a comprehensive library of course materials which are updated with each new software release and include our recommended methodology and best practices. DS tailors and supplements the ready-to-use material with your work processes and methods.

1 DESIGN YOUR CORPORATE LEARNING PROGRAM WITH OUR EXPERTS

Companion eLearning Courses

DS course materials are available online through 1000+ Companion eLearning Courses and Tests Libraries. Most of them are to be used during and after a class led by an instructor, while some are targeted for self-training. Ready to use and Tailored libraries are hosted in a centralized Learning repository, allowing for efficient management, distribution, access and control of content.

Virtual and on-site classes

DS University offers trainings online or in a physical classroom. It enables students to engage in face-to-face interaction with instructors and other students. From demonstrations to hands-on labs, classes provide a comprehensive learning experience.

5 TRAIN YOUR TEAM EVERYWHERE AT ANY TIME WITH BLENDED LEARNING

Testing and Certification Program

DS University provides all the skills assessments tools through online self-assessment libraries and performance tests or through complete product Certification Programs.

Coaching as part of blended learning

Follow-up coaching after training and testing reinforces individual commitments and actions. Many of our coaches are also trainers, so they are well placed to provide follow-up on our courses, on-site with your employees or through our virtual support network. Alternatively we can train your managers to be effective coaches.

6 TEST KNOWLEDGE AND SKILLS WITH ASSESSMENT LIBRARIES

7 SPEED USER ADOPTION WITH OUR COACHES

V6 PLM Course Catalog

Whether you want to start a new project on V6 or to transition from V5 to V6, you will benefit from DS experience and education coverage that enable organizations to apply the right methods for implementing product development best practices.

Our new Companion e-learning courses on V6 adopt a process-based approach to training.

Rather than focusing on individual commands and functions, they use industrial scenarios to teach you how to use the tools in specific contexts. They feature demo videos and exercises. The scenarios for both videos and exercises are the same, so you will practice exactly the same steps as seen in the videos.

V6 PLM Curricula

DS University has developed role-based learning paths that are recommended for the specific roles that play a part in your company. They will help your organization accelerate adoption and boost productivity.

Significant decrease in your training costs

With virtual classroom and e-Learning courses you get comprehensive training from DS experts over-the Web connectivity and using the same content delivered in DS traditional classrooms. Reduce your travel expenses with our online offering.

DS UNIVERSITY, A GLOBAL PRESENCE
