CATIA V6 Automotive Powertrain Transition (V6VPT)  Course Code CAT-en-V6VPT-F-V6R121  Brand CATIA Discipline CATIA Mechanical V6  Available Release V6R2012x  Duration 16 hours  Course Material English Level Fundamental Audience Automotive Designer, CATIA V5 Designer  Description This course will introduce you to CATIA V6 and the fundamental concepts of PLM. You will learn how to search for models in the V6 database and how to import existing V5 data. This course will teach what is new in CATIA V6 compared to CATIA V5. Using a role-based scenario in the context of an assembly you will learn how to design parts in collaboration with other users, perform modifications, check impacts and propagate modifications to the database. You will also learn how to manage assembly architecture and contextual links, reuse catalog data, work with large assemblies and analyze the resulting design.  Objectives  Upon completion of this course you will be able to: Import existing CATIA V5 data and store in V6 Search for data in the V6 database Open V6 parts for modification Share information with other users Analyze the impacts of modifications Propagate modifications Load a product configuration Use assembly-level features Analyze a product  Prerequisites  Students attending this course should be familiar with the basics of CATIA V5 (Part Design, Assembly Design, Drafting.)		
Brand CATIA  Discipline CATIA Mechanical V6  Available Release V6R2012x  Duration 16 hours  Course Material English  Level Fundamental  Audience Automotive Designer, CATIA V5 Designer  Description This course will introduce you to CATIA V6 and the fundamental concepts of PLM. You will learn how to search for models in the V6 database and how to import existing V5 data. This course will teach what is new in CATIA V6 compared to CATIA V5. Using a role-based scenario in the context of an assembly you will learn how to design parts in collaboration with other users, perform modifications, check impacts and propagate modifications to the database. You will also learn how to manage assembly architecture and contextual links, reuse catalog data, work with large assemblies and analyze the resulting design.  Objectives Upon completion of this course you will be able to:  - Import existing CATIA V5 data and store in V6 - Search for data in the V6 database - Open V6 parts for modification - Share information with other users - Analyze the impacts of modifications - Propagate modifications - Propagate modifications - Load a product configuration - Use assembly-level features - Analyze a product  Prerequisites Students attending this course should be familiar with the basics of CATIA V5 (Part Design, Assembly Design, Drafting.)
