ENOVIA

COLLABORATION
ENOVIA Collaboration for Adobe Creative Suite

ENOVIA® Collaboration for Adobe Creative Suite creates and accesses ENOVIA-managed data directly from within the native Adobe interface. This enables architects and engineers to manage data within ENOVIA and share that information across the construction project stakeholders while not disrupting the established productivity of those teams.

Key Benefits

• Simplify access to construction project data   using the native Adobe interface

• Improve collaboration between architects and engineers by sharing the same data

• Apply construction project data sharing and security without disrupting established end-user work procedures

• Increase overall end user efficiency and productivity

• Evaluate and maximize operations to establish and exploit best practices

Product Overview

In most organizations, planners, architects and engineers are driven constantly by strict deadlines causing a reluctance to adapt to new technologies and business processes. This is especially true if the new approach takes them away from their established comfort level and the tools they are familiar with.

ENOVIA Collaboration for Adobe Creative Suite enables architects and engineers to manage construction project content in the ENOVIA environment much earlier in the development process. Architects and engineers can collaborate much more effectively and in parallel with the development processes instead of after design completion. ENOVIA Collaboration for Adobe Creative Suite also minimizes end-user training and supports the rapid adoption of the ENOVIA® Apparel Accelerator™ for Design & Development.

Product Highlights

ENOVIA® Collaboration for Adobe Creative Suite has the following key capabilities:

Manage Artwork Views

Manage data in a single file and have the system automatically generate multiple views based on pre-defined layers (e.g. clean front, back, and line drawing) or a single image for the entire file. ENOVIA Collaboration for Adobe Creative Suite also provides an option to save the sketch images as a project's "Customer Choice" image.

Manage Color Palettes

Users of ENOVIA® Collaboration for Adobe Creative Suite create color palettes in Adobe Illustrator and synchronize those palettes with seasonal libraries within ENOVIA.

Securely Distribute Product Content

Control access to project content based on company and/or brand level rules. All security rules implemented within ENOVIA are respected by ENOVIA® Collaboration for Adobe Creative Suite to ensure that people can only view/update the information that they have access to. When saving the sketch to ENOVIA, users can indicate the lifecycle state in order to control the availability of the sketch to other users. In order to increase user adoption, ENOVIA Collaboration for Adobe Creative Suite also supports desktop-based authentication so that the end user does not need to login to the application using a separate username and password.

Communicate Changes

Users of ENOVIA Collaboration for Adobe Creative Suite can easily create subscriptions to designs of interest and receive e-mail alerts when changes are made. As a result, users are always aware of the latest design content.

Promote Company Standards

ENOVIA Collaboration for Adobe Creative Suite enables architects and engineers to leverage templates to create new content based on established company standards. In addition, architects and engineers can quickly find related sketches by saving sketches to company standard workspace folders created with the ENOVIA® Live Collaboration license.

Technical Highlights

- Web-based architecture
- Adds ENOVIA product menus and commands to the native Adobe toolbar
- Maps attributes and conventions between Adobe and ENOVIA
- Generates graphic views using defined layer definitions
- Data access through secure login
- Document and revision management
- Supports generation of derived output in PNG, JPEG, SVG, SWF and EMF formats (Note that some formats are only available for specific operating systems)

The Role of ENOVIA V6

ENOVIA Collaboration for Adobe Creative Suite supports building lifecycle management online for everyone, and the ENOVIA V6 values: global collaborative innovation, single BLM platform for online creation and collaboration, ready to use BLM business processes, and lower cost of ownership.

Dassault Systèmes, the **3D**EXPERIENCE Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 150,000 customers of all sizes, in all industries, in more than 80 countries. For more information, visit www.3ds.com.
