

3DVIA COMPOSER FOR MARINE AND OFFSHORE

Description	BOM Id	Qty
BAS1_0000_HULL.1	1	1
Deck	2	1
smg object 0	16	1
SPU_SEA_SUBSEA_TREES.1 explode	3	7
SPU_SHIP_DECK_HOUSE.1	4	1
SPU_SHIP_HELICO_PLATFORM.1	5	1
SPU_SHIP_OUTFITTING_001.1 explode	6	23
SPU_SHIP_RADAR_TOWER.1	7	1
TURRET_ACCESS	8	2
TURRET_DRAG_CHAIN_CARRIAGE.1	9	1
TURRET_PIPES_THROUGH_DRAG_CHAIN_TOWER.1	10	1
TURRET_PIPES_THROUGH_DRAG_CHAIN_TOWER_STRIPED_2.1	11	1
TURRET_RISING_PIPES_THROUGH_TURRET.1	12	1
TURRET_RISING_PIPES_THROUGH_TURRET_2.1	13	1
TURRET_SKETCHER_+ SOLIDS+BOOLEAN.1	14	1
TURRET_SUPERSTRUCTURE.1	15	1

REPURPOSE EXISTING 3D DESIGN DATA TO MAXIMIZE THE EFFECT OF PRODUCT COMMUNICATIONS

3DVIA Composer helps initiate 2D and 3D product communications earlier and keep them up-to-date automatically whenever designs change.

Marine and offshore manufacturers across the globe are optimizing business processes, accelerating time to market, and communicating technical product information more clearly with 3DVIA Composer. Easy to learn and intuitive to use, 3DVIA Composer provides an unmatched toolset for developing and deploying stunning illustrations and animations to support a wide variety of product communication needs. This allows product deliverables such as documentation, animated assembly instructions, interactive maintenance applications, and sales and marketing collateral to be produced more efficiently and communicate product information more effectively.

ADD A NEW DIMENSION TO PRODUCT COMMUNICATIONS

Communicate Clearly

Marine and offshore manufacturers are under continuous pressure to deliver innovative new products under increasingly constrained budgets. This pressure transcends all elements of the product development process including the need to supply regulatory compliance documentation and work instructions for product assembly, operation, and maintenance. Unfortunately, typical workflows for creating this material are highly inefficient and the final product is often confusing.

3DVIA Composer works directly with existing 3D design data (CAD) to enable the rapid development of unambiguous 2D illustrations and 3D animations. By leveraging exact design representations, teams can work faster while producing more clear and understandable product communications.

Operate Efficiently

Documentation and support teams are often forced to rely on engineers to produce the graphics used in system documentation and operation. By enabling users outside engineering to leverage 3D design data, 3DVIA Composer helps deliverables to be initiated before designs are finalized and kept up to date automatically as they change. The result is a significantly more efficient process that speeds time to market and allows engineers to focus on higher value tasks.

Share Easily

CAD models for medical devices can be large and difficult to manage. 3DVIA Composer automatically converts data into a lightweight and optimized format, allowing for rapid load speeds and efficient memory use on even the most complex assemblies. This data can then easily be leveraged to create visual communications that can be easily shared between internal teams and external partners.

Deliver Consistently

Creating documentation, manufacturing instructions, or service and support material is a time consuming and costly process. 3DVIA Composer allows for these materials to be created quickly and easily, helping to ensure a consistent level of operation.

Deploy Flexibly

3DVIA Composer is an ideal complement to familiar Microsoft® Office®, PDF, and HTML content delivery tools. Combined with the 3DVIA Composer Player and 3DVIA Composer Player Pro, interactive 3D maintenance and operation instructions can be flexibly delivered according to individual needs.

Share Securely

To help safeguard intellectual property, 3DVIA Composer is the only solution offering users two powerful ways to safeguard designs. With definable 'Right Manager' settings in 3DVIA Composer Player, access to content can be controlled; and with patented 'Secure 3D' technology, geometry can be precisely altered to prevent reverse engineering.

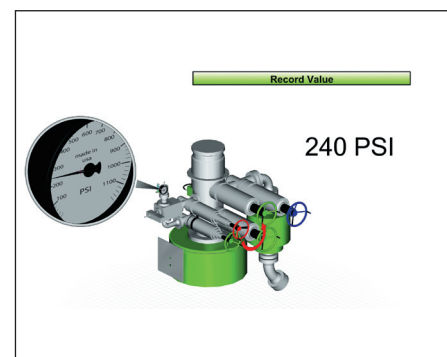

CUSTOMER QUOTE

"With 3DVIA Composer we can display exactly what information we need thereby eliminating unnecessary and not always precise assembly drawings that were often difficult to understand."

William Pegram
Managing Director, Isonaval

CUSTOMER BENEFITS

- Clearly communicate design intent
- Reduce documentation time
- Improve manufacturing quality and reduce errors
- Update deliverables automatically when designs change
- Bring products to market faster
- Differentiate from the competition
