

ENOVIA Collaboration for Adobe Illustrator

Product Objective

ENOVIA® Collaboration for Adobe Illustrator is designed to create and access Product Lifecycle Management (PLM) managed data directly from within the native Adobe interface. This enables design teams to manage data within PLM and share across the enterprise while not disrupting the established productivity of those teams.

Product Overview

In most organizations, creative and technical design teams are driven constantly by strict deadlines causing a reluctance to adapt to new technologies and business processes. This is especially true if the new approach takes them away from their established comfort level and the tools they are familiar with.

ENOVIA Collaboration for Adobe Illustrator enables design teams to manage data within PLM and share across the enterprise while not disrupting the established productivity of those teams. By managing the content in the PLM environment much earlier in the development process, organizations can collaborate much more effectively and in parallel with the development processes instead of after design completion. ENOVIA Collaboration for Adobe Illustrator minimizes end-user training and supports the rapid adoption of the ENOVIA® Apparel Accelerator™ for Design & Development.

Product Highlights

Manage Artwork Views

Manage data in a single file and have the system automatically generate multiple views based on pre-defined layers (e.g. clean front, back, and line drawing).

Securely Distribute Product Content

Control access to product content based on company and/or brand level rules.

Communicate Changes

Easily create subscriptions to designs of interest to receive e-mail alerts when changes are made.

Promote Company Standards with Document Templates

Enable design teams to leverage existing templates managed in the ENOVIA system to create new content based on established company standards.

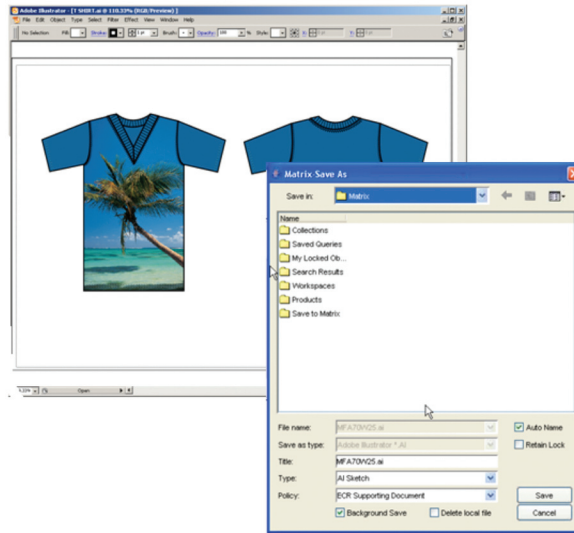

Technical Highlights

- Web-based architecture
- Adds ENOVIA product menus and commands to the native Adobe toolbar
- Maps attributes and conventions between Adobe and ENOVIA
- Generates graphic views using defined layer definitions
- Login and data access
- Document and revision management

Key Customer Benefits

- Enhance user adoption by simplifying access to product and component artwork using the native Adobe Illustrator interface
- Improve collaboration between design and technical design teams by sharing the same data
- Apply enterprise-level data sharing and security without disrupting established end-user work procedures
- Increase overall end user efficiency and productivity
- Evaluate and maximize operations to establish and exploit best practices

The Role of ENOVIA V6 and PLM 2.0

ENOVIA Collaboration for Adobe Illustrator supports PLM 2.0, product lifecycle management online for everyone, and the ENOVIA V6 values: global collaboration innovation, single PLM platform for intellectual property (IP) management, online creation and collaboration, ready to use PLM business processes, and lower cost of ownership.

About ENOVIA

ENOVIA is the recognized leader in delivering collaborative PLM solutions. We enable companies from a broad range of industries to dramatically accelerate innovation, time-to-market and revenue generation by collaboratively developing, building and managing products. Our solutions facilitate the sharing of concepts, content and context across product lifecycles and throughout value chains of employees, customers, suppliers and partners.

ENOVIA collaborative PLM solutions help global enterprises bring together people, processes, content and systems to achieve a compelling competitive advantage. Our interoperable solutions unify and streamline processes across the product lifecycle, enabling companies to easily and cost-effectively work on projects within and outside of their enterprises. Our adaptable, scalable technology is built to accommodate the ever-changing marketplace.

About Dassault Systèmes

As world leader in 3D and Product Lifecycle Management (PLM) solutions, the Dassault Systèmes group brings value to more than 90,000 customers in 80 countries. A pioneer in the 3D software market since 1981, Dassault Systèmes develops and markets PLM application software and services that support industrial processes and provide a 3D vision of the entire life cycle of products from conception to maintenance. Our offering includes integrated PLM solutions for product development (CATIA®, DELMIA®, ENOVIA®, SMARTEAM®), mainstream product 3D design tools (SolidWorks®), 3D components (Spatial/ACIS®) and SIMULIA®, DS' open scientific platform for realistic simulation. Dassault Systèmes is listed on the Euronext Paris (#13065, DSY.PA) stock exchange. For more information, visit 3ds.com.
