

## **ENOVIA Program Experience**

### **Product Objective**

ENOVIA® Program Experience provides project team members with real-time access and visibility to their projects across the global enterprise. Entire teams can raise risks and issues, communicate up to date status reports and collaborate cross-functionally, ensuring quicker time to market for project deliverables.

### **Product Overview**

ENOVIA Program Experience allows project team members to collaborate and report status on their assigned project tasks across the global enterprise. Project members get real-time access and visibility to their project assignments and raise risks and issues to communicate up-to-date status and collaborate with cross-functional team members on project deliverables.

### **Product Highlights**

#### **Manage Task Assignments**

Project team members are provided with a consolidated list of their assigned project tasks from all the projects they are members. Project members can filter their tasks based on completion status. All critical tasks appear in red font for easy visibility. Task assignees can further define subtasks within constraints of the estimate start and end dates defined by the summary task. To communicate status, project members can update task percentage completion and enter applied effort.

#### **Task Deliverables**

As tasks are assigned and being worked, task deliverables should be associated and managed in the context of the task. As deliverables progress through their lifecycle, the system automatically updates task status. After tasks are completed, the deliverables are stored and categorized into project folders for additional access control and increased visibility. To keep task deliverables on schedule, project leaders can configure automatic reminders of upcoming or late tasks that project members will receive in their company email.

#### **VPM Project Management**

For companies using either ENOVIA® VPM V5 or ENOVIA® VPM Central® V6, it is possible to monitor design activity with the project using ENOVIA® Program Central™ V6. This allows access to outputs from design on the corresponding project tasks. In V6, ENOVIA Program Experience and ENOVIA® VPM Central™ both run on the same technology platform. Therefore, users can search for and associate VPM data as deliverables to assigned project tasks easily. VPM Tasks are assigned to designers as part of the ENOVIA Program Central Work Breakdown Structures (WBS) and are accessible immediately within this design environment. For companies using ENOVIA VPM V5, ENOVIA Program Experience synchronizes project tasks to VPM actions. These triggered VPM V5 actions include required input for a designer to do his job.

### **Key Customer Benefits**

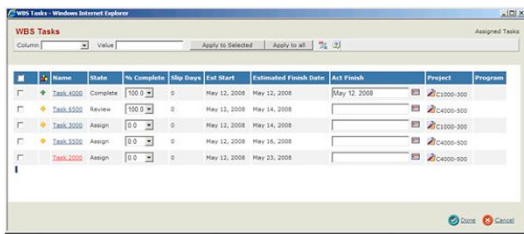

- Collaborate on task deliverables with real time reporting on actual status for assigned project tasks along with easily tracking critical tasks
- Mitigate and report status on assigned project risks
- Capture and execute ad-hoc project risks
- Track meetings, decisions, and artifact baselines so that traceability is established for historical reference

## Product Highlights (continued)

### Project Content

Controlled and uncontrolled folders and subfolder structures securely manage and store all project contents. Security is established on a per project basis with a project owner and project leads determining individual access rights. Within a project, each folder and file maintains additional levels of security. Lifecycle controls establish folder content baselines as a means of measuring performance and historical references. Team members can establish a single environment for managing and sharing all project information — not just documents. By subscribing to document events, members become informed immediately as changes and additions occur. Reports provide a consolidated list of project-related content either from the work breakdown structure (WBS) or from the file folder structure.

Name	State	% Complete	WBS Items	Est Start	Estimated Finish Date	Act Finish	Project	Program
Task_1000	Complete	100.0	0	May 12, 2008	May 12, 2008	May 12, 2008	C1000-300	
Task_1000	Review	100.0	0	May 12, 2008	May 14, 2008		C4000-500	
Task_1000	Assign	0.0	0	May 12, 2008	May 14, 2008		C1000-300	
Task_1000	Assign	0.0	0	May 12, 2008	May 16, 2008		C4000-500	
Task_1000	Assign	0.0	0	May 12, 2008	May 23, 2008		C4000-500	

### Team Collaboration

Project members can create ad-hoc routes or workflows to circulate tasks, projects and files for further work and/or approvals and conduct online discussions regarding a project or task. All team members can subscribe, view and comment on the original discussion topic or any of the subsequent responses.

### About ENOVIA

ENOVIA is the recognized leader in delivering collaborative PLM solutions. We enable companies from a broad range of industries to dramatically accelerate innovation, time-to-market and revenue generation by collaboratively developing, building and managing products. Our solutions facilitate the sharing of concepts, content and context across product lifecycles and throughout value chains of employees, customers, suppliers and partners.

ENOVIA collaborative PLM solutions help global enterprises bring together people, processes, content and systems to achieve a compelling competitive advantage. Our interoperable solutions unify and streamline processes across the product lifecycle, enabling companies to easily and cost-effectively work on projects within and outside of their enterprises. Our adaptable, scalable technology is built to accommodate the ever-changing marketplace.

### About Dassault Systèmes

As world leader in 3D and Product Lifecycle Management (PLM) solutions, the Dassault Systèmes group brings value to more than 90,000 customers in 80 countries. A pioneer in the 3D software market since 1981, Dassault Systèmes develops and markets PLM application software and services that support industrial processes and provide a 3D vision of the entire life cycle of products from conception to maintenance. Our offering includes integrated PLM solutions for product development (CATIA®, DELMIA®, ENOVIA®, SMARTEAM®), mainstream product 3D design tools (SolidWorks®), 3D components (Spatial/ACIS®) and SIMULIA®, DS' open scientific platform for realistic simulation. Dassault Systèmes is listed on the Euronext Paris (#13065, DSY.PA) stock exchange. For more information, visit [3ds.com](http://3ds.com).

### Issue / Risk Management

Issues are real incidents, inquiries, or problems that impact a project negatively, and risks are anything that potentially can impact a project negatively. Issue management provides a context for capturing, tracking, and closing Issues in the context of a project. Issues are identified, captured, classified, and assigned to project members for resolution. Risk management enables project teams to identify, quantify, analyze, and mitigate project risks. During the analysis process, risks need to be assessed and quantified in two dimensions. These two dimensions are impact and probability with ranges from 1-5. These dimension values determine risk priority and clarify which project risks need mitigation to help minimize potential negative impacts.

### Project Meeting Traceability

Meetings are used to maintain artifacts for historical references. Project members can define a meeting for their assigned tasks with an invitee list, record of actual attendance, agenda topics and items, and time duration allocated for each topic. To record what was discussed during the meeting, project members can associate document attachments, capture issues that need follow up and record meeting decisions.

### The Role of ENOVIA V6 and PLM 2.0

ENOVIA Program Experience supports PLM 2.0, product lifecycle management online for everyone, and the ENOVIA V6 values: global collaboration innovation, single PLM platform for intellectual property (IP) management, online creation and collaboration, ready to use PLM business processes, and lower cost of ownership.
