

“Advanced 3D measurement”

DELMIA IN2 or IP2

Metrolog V5

Online process inspection, drive 3D measuring machine, analyze how closely manufactured parts compare to their CAD data, in real time

- ▶ Online programming of any type of 3D measuring device
- ▶ Direct access to CATIA geometry and FD&T
- ▶ Input program: Metrolog XG, Metrolog X4, DMIS, native V5 process
- ▶ Exports measuring data in different format or native CATpart

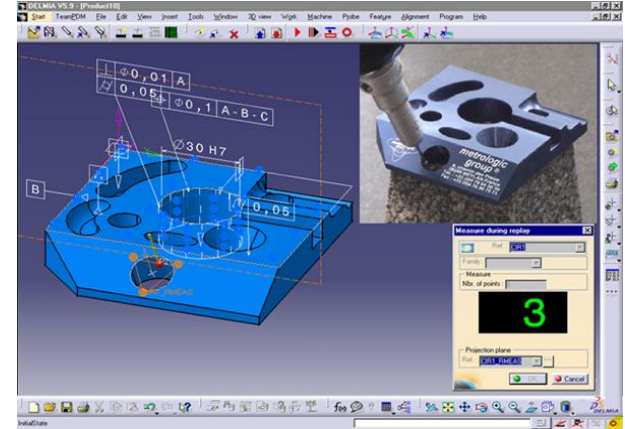

DELMIA IN2 or IP2

SILMA V5

Offline process measurement planning and validation

- ▶ Offline programming of any type of 3D measuring device
- ▶ Measuring path optimization and collision detection
- ▶ Post inspection analysis including reports, best fitting & additional GD&T evaluations
