COM/VDAFS CAA V5 Based

Bi-directional interface between CATIA V5 and VDAFS

Any CATIA Design Config

Coreq Prereq

- VDA surface interface (VDAFS) is a neutral format supporting the exchange of 3D geometric data and especially of sculptured surfaces
- COM/VDAFS for CATIA V5 supports the bi-directional data conversion for points and point sets, 3D curves, sculptured surfaces and trimmed surfaces (FACES)
- The functionality of COM/VDAFS is completely integrated in the CATIA system and enables an interactive conversion within the CATIA session
- Additionally, a batch call interface and a high sophisticated JAVA user interface for submission and administration of batch jobs outside the interactive CATIA session are available
