## SUCCESS THANKS TO OPTIMISED BUSINESS PROCESSES

Comprehensive, sound but nevertheless lean business processes increase competitiveness in an ever fiercer global contest to attract potential customers.

Why not use the options of our innovative process management solutions to optimise your business processes and create a crucial competitive edge?

## GROW IN LINE WITH THE REQUIREMENTS

Our innovative solutions grow with your requirements. Therefore, scalability, flexibility and open architecture are essential components for a modern process solution that will form the basis of your business processes for many years to come.

## CHOOSE THE BEST

Innovative product development requires the most innovative applications to support your engineers. Therefore, Version 6 from Dassault Systèmes is your number one choice! Using the undisputed market leader SAP you don't compromise in the ERP environment!

Have you identified the potential comprehensive business processes based on these company solutions? Looking for a process integration that grows with your enterprise solutions to create seamless business processes across DS Version 6 and SAP? Are you looking to expand your company solutions on a step-by-step basis and ideally supplement the integration at each step?

Is DS V6 more than CATIA V6 for you, and when using ENOVIA, DELMIA, SIMULIA etc. you prefer not to dispense with the advantages of efficient SAP integration? Expect a consulting, implementation and development partner with a wealth of industrial experience in your sector and in-depth expertise in the DS and SAP environment?

Do you place most trust in yourself when defining your specific business processes, and nevertheless do not want to dispense with the viewpoint of a competent, external consultant?

**Sie haben Ihren Partner und Ihre Lösung gefunden!**

## CLEAR GOALS AT A GLANCE

**We pursue clearly defined goals by way of our overall solution:**

- :: Process security and quality
- :: Process cost reduction
- :: Process acceleration
- :: Pleasure in using the application

Each IT solution is, at most, as good as its users. Therefore, we do not only focus on the content but also on the packaging. We are only satisfied once the users of our solution enjoy contributing to the business process.

## THE DIFFERENCE

Multi bi-directional exchange of the relevant product data between DS Version 6 and SAP is the natural core demand placed on an integration product. The real benefit is achieved by way of the process integration, i.e. the exchange of process data and the option of controlling business processes beyond the application limits.

As the development partner of Dassault Systèmes and SAP, we regularly harmonise the development plans for the DS Version 6 – SAP-Integration with our partners' development plans. Therefore, the integration is up to speed with the further development of your company solutions, and your investment is protected.

We have been one of the world's most successful business partners of Dassault Systèmes for more than 20 years. Thanks to our international team we are also, or in particular regarding V6, the right partner for wide-ranging V6 use in globally distributed development teams.

We have been SAP AG's official partner for the CATIA integration since 1999. More than 150 successful DS-SAP integration projects, more than 10,000 users, consultants boasting a wealth of industrial experience – our practical approach makes all the difference.

Whether you "only" integrate CATIA V6 with SAP or intend to link a fully extended V6 solution in several phases of the NPDI process with SAP- our DS Version 6 – integration provides basic entry and scalable expansion.

## ENTRY
