Solutions Library for ENOVIA V6R2009x

The Solutions Library for ENOVIA is a collection of the most popular and useful extensions to tailor the behavior of ENOVIA products that are either:

a) Written by the Professional Services
organization, or
b) Developed and submitted by clients, or
c) Developed and submitted by ENOVIA partners.

This not only allows ENOVIA clients and partners to take advantage of these tools, but also allows them to provide input as to their business use and applicability. The collection includes Task-oriented Applications, Application Extensions, and Utility Components.

Applications are offered in the following categories:

A) Task Oriented Applications

- Applications that are designed to solve a specific business task
- Designed to be generic (not specific to any one Customer)
- Applications can be installed independently of each other, i.e. only load what is needed
- Configurable (when applicable)

B) Application Extensions

- Enhances existing ENOVIA applications
- Co-developed by ENOVIA Professional Services and Client
- Reviewed and approved by ENOVIA Engineering and Product Management

C) Utility Components

- Designed to be plugged into Task Oriented Applications, Application Extensions and other implementation solutions.
- Designed with reuse in mind
- Configurable (when applicable)

An order for this PRPQ will ship both Solutions Library for ENOVIA V6R2009 and V6R2009x media.

Programming Requirements

Hardware and Software Requirements

The capability provided by this product is achieved through the use of the API's of the ENOVIA V6 product suite. As a result, these components have no specific operating environment requirements beyond those of the standard ENOVIA products on which they operate.

ENOVIA Studio Modeling Platform (DTE) is a pre-requisite for ENOVIA Solutions Library. A license of ENOVIA Solutions Library must be purchased for each ENOVIA Studio Modeling Platform environment that uses any of the components delivered with ENOVIA Solutions Library.

Licensed Program Materials Availability

- Restricted materials - No. This licensed program is available without source licensed program materials. It is available in object code only.

Supplemental Terms

Type/Duration of Program Services (also referred to as "Support Services")

Use-Based Charges/Usage Restrictions

Charges for this program are based on the number of users logged on at any time. The total number of users logged on may not exceed the number for which you have been authorized. If the total number exceeds your authorization, you must notify Dassault Systemes and obtain additional authorizations.

Softcopy Publications

The program that Dassault Systemes licenses may include licensed publications in displayable or source form. Except as provided in this section, the terms and conditions of the license agreement with Dassault Systemes apply to these publications and to any copies that are made from them. The licensed publications may be used in displayable or source form on all machines designated for this program. The licensed publications may also be copied and used on other machines in support of authorized use of this program. To support authorized use of the Program, printed copies of the displayable or source material may be made if the copyright notice and any other legend of ownership is reproduced on each copy or partial copy. [1]

Warranty

This program is warranted as specified in the Dassault Systemes license.

Licensed Program Specifications may be updated from time to time and such updates may constitute a change in specifications.

Following the discontinuance of all program services, this program will be provided "As Is" as specified in the Dassault Systemes license.
