

LICENSED PROGRAMS TERMS FOR EXALEAD® V6R2013x

Terms that are initially capitalized are defined in the Glossary - Release 1, available at www.3ds.com/terms/glossary. These terms may be supplemented, as necessary, by other initially capitalized terms which are directly defined in these Licensed Programs Terms.

These Licensed Programs Terms (“LPT”) and the terms incorporated herein by reference (including terms referenced on a website), are an integral part of the license agreement between [DS](#) and [Licensee](#) (“Agreement”), which refers to this LPT. In the event of a discrepancy, inconsistency or contradiction between this LPT and the other terms of the Agreement, the provisions of this LPT shall prevail, but only with respect to the [Licensed Programs](#) to which this LPT applies. Licensee acknowledges that it has full knowledge of all these terms and those incorporated herein by reference.

AVAILABLE PRICING STRUCTURES

Licenses and [Support Services](#) on the Licensed Programs to which this LPT applies may be ordered according to one of the following pricing structures, as specified in the [Product Portfolio](#), available at www.3ds.com/terms/product-portfolio

- [PLC/ALC](#), or
- [TBL/ALC](#), or
- [YLC](#)

Other pricing structures may be made available on a case by case basis.

LICENSING SCHEMES & GEOGRAPHIC SCOPE

An EXALEAD CloudView environment (“Environment”) is comprised of a group of CloudView servers forming a single computational network through which a CloudView Instance is built and accessed. An Environment is constituted of one server acting as the coordinator and an unlimited number of slave servers, all dedicated to the creation, maintenance and search services of a single CloudView Instance.

A “CloudView Instance” means a virtual document storage built on top of one or more physical indexes (“Physical Indexes”) sharing a common data model. A Physical Index represents a part of the indexed content. A Physical Index can be split over several servers in the given Environment.

Each Licensed Program to which this LPT applies, regardless of the licensing scheme under which it is licensed, shall be used by the Licensee for one specific “Production CloudView Instance” as defined herein after.

Upon request, the Licensee shall be granted the right to install multiple “Production CloudView Instances”, as long as their cumulative total of Document Tokens (i.e. available under “Token Based license for Document” scheme) does not exceed 2.500.000.

Usage limitations defined in the Agreement, including both the authorized use and authorized users, are always counted and limited by one centralized EXALEAD License Server tied to its hardware configuration (node-locked), and are split between all CloudView Instances.

The licenses on the Licensed Programs to which this LPT applies are granted pursuant to the Agreement, and according to the following licensing schemes (specifying the authorized use and the authorized users), as specified in the Product Portfolio, the terms of which are incorporated herein by reference:

- [System License](#)
- [Token Based](#)
- [Named User Based](#)

➤ [System License per Application](#)

System License:

For the purpose of and within the scope of this LPT, all definitions of “System License” provided for in the above referenced Glossary - Release 1, are cancelled and replaced by the following definition:

A System License means a license to use certain Licensed Program(s) for authorized CloudView Instance(s). A minimum number of Named User Based licenses or Token Based licenses for Query Calls may also be required in order to operate a System License.

System License per Application:

A System License per Application means a System License to use the Licensed Program exclusively for a specific application (i) developed by Licensee for a specific business purpose and (ii) as described and identified in the Description of Application Form (i.e. a questionnaire completed by Licensee and accepted by DS, attached to the Quote).

Token Based licenses:

There are two different types of Token Based license, as specified in the Product Portfolio and as defined hereinafter:

Token Based license for Document: A Token Based license for Document grants the Licensee the right to index a limited number of Documents, as indicated in the Product Portfolio, according to their different types (Log, External Document, Internal Document or Business Item) as defined below.

A **Log** is a structured record logging a single event in a system with no rich attribute.

Example: an HTTP server log line, a single SAP transaction, a single line of a purchase receipt, an email (excluding attachments).

An **External Document** is an unstructured document crawled from websites which do not belong to the Licensee.

Example: an HTML web page, a PDF document crawled from websites not belonging to the Licensee.

An **Internal Document** is an unstructured document that was created by the Licensee.

Example: an internal wiki page, a page of an internal knowledge base portal (even if retrieved using the web crawler), an office document

A **Business Item** is a business document, work product or commodity that is used in business operations.

Example:

- An article in ERP with quantities, price, sourcing
- A customer record in CRM with inventory, contracts
- A manufactured product, processed or sold by the company: part, assembly with requirements, material, weight...

Token Based license for Query Calls: A Token Based license for Query Calls grants the Licensee the right to allow End-Users to a query capacity (a limited number of queries for a given period) of a specific type of Query Calls (Find Query Calls or Decide Query Calls as defined below) to authorized CloudView Instance(s).

An **End-User** is an individual (not necessarily a Licensee's employee or agent) that may be authorized to use services provided by authorized CloudView Instance(s) if Licensee has ordered the Token-Based Licenses for Find Query Calls or Decide Query Calls.

A **Query Call** is a single search for information using the Licensed Program.

A **Find Query Call** is a Query Call sent by an End-User to authorized CloudView Instance(s) in order to locate Documents and retrieve search results as a list of Document pointers with a short extract or summary and the associated navigation facets.

A **Decide Query Call** is a Query Call sent by an End-User to authorized CloudView Instance(s) in order to obtain an aggregated view of an exhaustive list of Documents

resulting from one or more search queries.

Named User Based licenses:

As specified in the Product Portfolio, a Named User Based license is either for Find User or Decide User as defined hereinafter:

Find User is a Named User that uses the Licensed Program to locate a Document from a search form and to retrieve search results as a list of Document pointers with a short extract or summary and the associated navigation facets.

Decide User is a Named User that uses the Licensed Program to obtain an aggregated view of an exhaustive list of Documents resulting from one or more search queries.

Licenses of the Licensed Programs to which this LPT applies are granted for use only in the country for which the license is ordered. Except as otherwise provided for Licensed Programs for which remote access is allowed as specified below, Named Users whose usual workplace is located in the same country as the country where such use of the Licensed Program has been authorized, may use the Licensed Program in any other country (subject *inter alia* to the Export and Re-export laws and regulations provision of the Agreement) for purposes of a business trip of a maximum of thirty (30) consecutive days.

OTHER PERMITTED USES

ACCESS BY END-USERS. For certain Licensed Programs which are licensed under the Token Based license for Query Calls, as identified in the Product Portfolio, and subject to all terms and conditions of the Agreement and this LPT, Licensee is authorized to allow End-Users to send Query Calls to authorized CloudView Instance(s). Except the limited authorized use explicitly granted under this LPT to the Licensee in relation to the End-Users, no other express or implied right or license is granted hereunder to End-Users.

Licensee shall indemnify, defend and hold harmless DS against any claim, expense, judgment, damage, or loss (including reasonable attorneys' fees) which arises out of or in any way relates to Licensee's use of the Licensed Programs by and/or with End-Users.

PRODUCTION AND NON PRODUCTION CLOUDVIEW INSTANCE

Upon request, the Licensee can be granted twice the capacity of the purchased Production CloudView Instance(s) for the purpose of running Non-Production CloudView Instance(s). This additional capacity is counted and limited by two additional License Server(s), each of them having a capacity equivalent to the overall capacity of the Production CloudView Instance(s).

A **Production Cloudview Instance** is a CloudView Instance used for the actual processing and/or throughput of data, including redundancy, as opposed to "Non-Production Cloudview Instance".

A **Non-Production Cloudview Instance** is a CloudView Instance dedicated to development, testing, pre-production, quality assurance or backup, as opposed to "Production Cloudview Instance".

REMOTE ACCESS. If so specified in the Product Portfolio, Users and/or [Extended Enterprise Users](#) may access and use the Licensed Program remotely via the Internet from any country (subject *inter alia* to the Export and Re-export laws and regulations provision of the general terms of the Agreement).

EXTENDED ENTERPRISE USERS. For certain Licensed Programs as identified in the Product Portfolio and subject to all terms and conditions of the Agreement and this LPT, Licensee is authorized to give access to its licenses of such Licensed Programs to Extended Enterprise Users for the sole and exclusive purpose of enabling the Extended Enterprise User to conduct business with Licensee, *provided that* use of the Licensed Program by any such Extended Enterprise User shall be limited to use (a) solely as configured and deployed by Licensee and (b) solely in connection with the Extended Enterprise User's performance of services for and on behalf of Licensee, and not for such Extended Enterprise User's own or another's account or for the purpose of hosting, modifying, or otherwise using or maintaining the Licensed Programs.

OUTSOURCING TO A THIRD PARTY. Licensee is authorized to execute the Licensed Programs remotely on computers operated by third parties, provided that only duly authorized Users, and/or Extended

Enterprise Users if applicable, shall have access to the Licensed Programs. Licensee may appoint a third party, such as an outsourcer, to operate the hardware on which the Licensed Programs are installed, on behalf of Licensee, only if (i) Licensee does not assign the Agreement or any licenses granted thereunder, in whole or in part, to the third party, (ii) the third party and Licensee enter into a written Agreement under which the third party agrees that its access to and use of the Licensed Programs is subject to all of the grant of license, confidentiality, restrictions, and limitations on use provisions of the Agreement, and (iii) such third party is not a competitor of any [DS Group Company](#). Licensee acknowledges and agrees that the third party shall be deemed an agent of Licensee. If Licensee becomes aware of any actual or suspected unauthorized use or disclosure of the Licensed Programs, Licensee shall immediately terminate the third party's access to and use of the Licensed Programs. Licensee shall indemnify, defend, and hold harmless DS against any claim, expense, judgment, damage, or loss (including reasonable attorneys' fees) which arises out of or in any way relates to each third party's access to or use of the Licensed Programs.

LICENSEE'S RESPONSIBILITY. In addition to all terms and conditions of the Agreement and all other provisions of this LPT, Licensee agrees that it is responsible for ensuring that any use of the Licensed Programs by all Users, and if applicable all Named Users, End-Users and/or Extended Enterprise Users shall at all times be in compliance with the terms and conditions of the Agreement, and any breach by Extended Enterprise Users of the terms of this Agreement shall also be deemed a breach by Licensee.

SECURITY MECHANISMS

DS and its affiliated companies take all legal steps to eliminate piracy of their software products. In this context, the Licensed Programs may include a security mechanism that can detect the installation or use of illegal copies of the Licensed Programs, and collect and transmit data about those illegal copies only (including IP and MAC addresses). Data collected will not include any Licensee data created with the Licensed Programs. By using the Licensed Programs, Licensee consents to such detection and collection of data, as well as its transmission and use if an illegal copy is detected. DS also reserves the right to use a hardware lock device, license administration software, and/or a license authorization key to control access to the Licensed Programs. Licensee may not take any steps to avoid or defeat the purpose of any such measures. Use of any Licensed Programs without any required lock device or authorization key provided by DS is prohibited.

Trademarks

Company, Licensed Programs, products and services names may be trademarks or service marks of related companies.

EXALEAD, CloudView and the 3DS logo are trademarks or registered trademarks of Dassault Systèmes or its subsidiaries in the US and/or in other countries.
