

LICENSED PROGRAMS TERMS FOR

SIMULIA Abaqus for CATIA V5

Release V5-6R2013

Terms that are initially capitalized are defined in the Glossary - Release 1, available at www.3ds.com/terms/glossary.

These Licensed Programs Terms ("LPT") and the terms incorporated herein by reference (including terms referenced on a website), are an integral part of the license agreement between DS and Licensee ("Agreement"), which refers to this LPT. In the event of a discrepancy, inconsistency or contradiction between this LPT and the other terms of the Agreement, the provisions of this LPT shall prevail, but only with respect to the Licensed Programs to which this LPT applies. Licensee acknowledges that it has full knowledge of all these terms and those incorporated herein by reference.

AVAILABLE PRICING STRUCTURES

Licenses and Support Services on the Licensed Programs to which this LPT applies may be ordered according to one of the following pricing structures, as specified in the Product Portfolio, available at www.3ds.com/terms/product-portfolio:

- PLC/ALC, or
- TBL/ALC, or
- YLC

Other pricing structures may be made available on a case by case basis.

LICENSING SCHEMES & GEOGRAPHIC SCOPE

The licenses on the Licensed Programs to which this LPT applies are granted pursuant to the Agreement, and according to one the following licensing schemes (specifying the authorized use and the authorized Users), as specified in the Product Portfolio, the terms of which are incorporated herein by reference:

- Concurrent Based (floating)
- Token Based

The Licensed Programs may be accessed and executed by Users whose usual workplace is at the same facility as the License Server or on the Machines for which license keys have been provided, as applicable (1) on the License Server itself, and (2) on other Machines that are networked to the License Server at the same site as the License Server or are located in the same country as the License Server, as identified in the Quote .

Within the parameters of the Quote, Licensee may from time to time designate the License Server(s) for which license keys shall be provided and from which tokens shall be available to other Machine(s) subject to the restrictions described in this LPT.

Licensee shall promptly provide DS with usage reports when requested.

Number of tokens. For analysis jobs, the number of required tokens (also called "analysis tokens") is determined by the type of analysis being performed and the number of CPUs or cores used in running the analysis job. Required token configurations may be changed for new or renewed licenses and with modifications of the covered products. Licensee will receive one or more license keys, each for a specific License Server which will permit access to the Licensed Programs. License keys include the agreed number and type of tokens for the Licensed Programs. The Licensed Programs, license tokens and applicable fees

are specified in the Quote.

Additional Information for Concurrent Based License: Each Licensed Program in Concurrent Based mode requires a unique license feature (sometimes referred to as “interactive tokens”) for each concurrent User. Licensee will receive one or more license keys, each for a specific License Server which will permit access to the Licensed Programs.

OTHER PERMITTED USES

USE FOR CERTAIN SERVICES. Except for [Development Tool Kits](#), Licensee is authorized to use such Licensed Programs for added-value engineering and/or implementation services. Added-value engineering or implementation services are services to deliver to a third party end user any deliverable generated specifically for said third party end user from use by Licensee of the Licensed Programs. In any event, Licensee may not (A) use the Licensed Programs to develop software code for (i) general distribution by any means, and whether alone or bundled or delivered with any product, data, information, software, or other element, or (ii) any services that do not add value attributable to the intervention of specific human skills, such as, without limitation, in a data services operation or as an applications service provider, or (B) install and/or operate the Licensed Programs on any hardware and/or software environment owned by or under control of any third party, or (C) represent or imply to any party that it is an authorized or certified provider of services for DS. Licensee shall indemnify, defend and hold harmless DS against any claim, expense, judgment, damage, or loss (including reasonable attorneys’ fees) which arises out of or in any way relates to Licensee’s use of the Licensed Programs with third party end users.

OUTSOURCING TO A THIRD PARTY. Licensee is authorized to execute the Licensed Programs remotely on computers operated by third parties, provided that only duly authorized Users, and/or [Extended Enterprise Users](#) if applicable, shall have access to the Licensed Programs. Licensee may appoint a third party, such as an outsourcer, to operate the hardware on which the Licensed Programs are installed, on behalf of Licensee, only if (i) Licensee does not assign the Agreement or any licenses granted thereunder, in whole or in part, to the third party, (ii) the third party and Licensee enter into a written Agreement under which the third party agrees that its access to and use of the Licensed Programs is subject to all of the grant of license, confidentiality, restrictions, and limitations on use provisions of the Agreement, and (iii) such third party is not a competitor of any [DS Group Company](#). Licensee acknowledges and agrees that the third party shall be deemed an agent of Licensee. If Licensee becomes aware of any actual or suspected unauthorized use or disclosure of the Licensed Programs, Licensee shall immediately terminate the third party’s access to and use of the Licensed Programs. Licensee shall indemnify, defend, and hold harmless DS against any claim, expense, judgment, damage, or loss (including reasonable attorneys’ fees) which arises out of or in any way relates to each third party’s access to or use of the Licensed Programs.

SECURITY MECHANISMS

DS and its affiliated companies take all legal steps to eliminate piracy of their software products. In this context, the Licensed Programs may include a security mechanism that can detect the installation or use of illegal copies of the Licensed Programs, and collect and transmit data about those illegal copies only (including IP and MAC addresses). Data collected will not include any Licensee data created with the Licensed Programs. By using the Licensed Programs, Licensee consents to such detection and collection of data, as well as its transmission and use if an illegal copy is detected. DS also reserves the right to use a hardware lock device, license administration software, and/or a license authorization key to control access to the Licensed Programs. Licensee may not take any steps to avoid or defeat the purpose of any such measures. Use of any Licensed Programs without any required lock device or authorization key provided by DS is prohibited.

Trademarks

SIMULIA, Abaqus, CATIA as well as Dassault Systemes’ logo are trademarks or registered trademarks of Dassault Systèmes or its subsidiaries in the US and/or in other countries.

Company, products and services names may be trademarks or service marks of related companies.
