

SGN

SGN designs and manufactures compact, user-friendly and affordable electric delivery vehicles under the brand Musoshi.

“The 3DEXPERIENCE platform helps us shorten development cycles and deliver high-quality electric vehicles with end-to-end continuity.”

– Sezer CİNDEMİR, R&D Manager, SGN

Challenge

As a startup, SGN designs and manufactures electrified delivery and mobility vehicles that combine compact size, ample storage and ease of use in challenging traffic areas like highly populated cities and narrow streets. SGN needed a solution that could meet its product development requirements and accelerate its go-to-market.

Solution

The company adopted the 3DEXPERIENCE® platform to accelerate the research and development for its electric vehicles and centralize the design and engineering applications in a single secure environment.

Benefits

The 3DEXPERIENCE platform helped SGN manage its R&D processes in the same platform, ensuring CAD, EBOM and MBOM data accuracy. The platform enables efficient collaboration among teams that accelerates the delivery of reliable and high-quality products, and improves overall customer satisfaction.
