

## **Dassault Systèmes Extends Agreement with Hyundai Motor by Five Years**

- **Dassault Systèmes and Hyundai Motor have been partners for 30 years, aiming to achieve technology development through Dassault Systèmes' CATIA applications**
- **Extended agreement between the two companies will support Hyundai Motor's future growth momentum and new business**

[Dassault Systèmes](#) (Euronext Paris: FR0014003TT8, DSY.PA) today announced a supply and maintenance agreement with Hyundai Motor for Dassault Systèmes' CATIA applications.

Through this agreement, Hyundai Motor expects to help its diverse partners locally and globally by being able to foster their seamless collaborative technology relationships.

Dassault Systèmes is recognized as a long-standing growth partner of Hyundai Motor. It has contributed to the development of vehicles and related technologies by providing CATIA and technical support to Hyundai Motor for the past 30 years.

CATIA, which is currently used by the technical center of Hyundai Motor group located in several countries, is a solution used for designing the entire production process in a 3D model, from the initial idea planning stage to design, analysis, and assembly. CATIA has contributed to shortening Hyundai Motor's product development process and reducing its costs.

Dassault Systèmes' CATIA and 3DEXPERIENCE platform are the best and most innovative solutions for successful products, enabling businesses to meet the needs of all manufacturers, from original equipment manufacturers to their supply chains.

"The extension of our agreement with Hyundai Motor takes place at a time when the mobility industry in Korea is accelerating toward the electrification of vehicles. This has significant implications for helping the related industry prepare for new changes in a more stable way," said Samson Khaou, Executive Vice President, Asia-Pacific, Dassault Systèmes. "Through this partnership, Dassault Systèmes will continue to provide the best support to Hyundai Motor with technology and know-how to help it take a leading position in the global automobile market as well as in new business."
