EXPLORE DELTAGEN
THE INTUITIVE, MULTI-TOUCH APPLICATION FOR REAL-TIME PRESENTATIONS

DASSAULT SYSTEMES

TAKE CONTROL AND EMPOWER YOUR WORKFORCE WITH XPLORE DELTAGEN

XPLORE is the first multi-touch navigation tool introducing a new experience in interacting with your scene. Its intuitive navigation function facilitates realtime product presentations and makes it as easy to use as surfing the web. The add-on module for DELTAGEN allows designers and engineers to conduct real-time presentations out of DELTAGEN themselves.

Whether you're on a desktop, a Powerwall or in a CAVE, you can navigate around a virtual product, switch all variants and trigger animations. Navigation like rotate, zoom, or pan is possible via the mouse or multi-touch gestures. You can define and modify turntables and compare various models, enabling efficient design reviews or even Point of Sale applications.

XPLORE ensures a perfect flow to your presentations and seamless interaction with your audience. With direct control of the scene displayed, validation and decision-making becomes a lot faster.

SYSTEM REQUIREMENTS

The following quotes the required setup specifications for running DELTAGEN and DELTAVIEW and for processing the 3D scenes that are loaded.

Only NVIDIA® graphic cards are capable of displaying all visual effects and shaders created with our software. This cannotbe guaranteed with graphic cards from other manufacturers. Visit our Software Services website for constantly updated information.
