

## **OUTSCALE Kubernetes as a Service (OKS): The first managed and dedicated platform, available within minutes on the SecNumCloud-certified public cloud.**

Saint-Cloud, March 25, 2025 – OUTSCALE, a Dassault Systèmes brand, announces the launch of OUTSCALE Kubernetes as a Service (OKS), a unique offering on the market. As the first managed, dedicated platform enabling the creation of a customer environment available within minutes on a SecNumCloud 3.2-certified public cloud, OKS ensures complete isolation of client environments while delivering the performance and flexibility required by businesses and public institutions.

### **A unique platform combining sovereignty, full isolation, and rapid deployment:**

- **Dedicated clusters:** Each customer benefits from a fully isolated Kubernetes environment with a dedicated control plane, ensuring optimal data protection and partitioning
- **Immediate availability:** OKS enables the creation of a customer environment that is operational within minutes, allowing organizations to deploy their cloud-native applications without delay.
- **Maximum security and compliance:** Available on the SecNumCloud 3.2-certified public cloud infrastructure, OKS meets the highest cybersecurity and data protection standards.

### **OKS: The guarantee of a sovereign and interoperable cloud**

With over 95% of organizations expected to use containers in production by 2029 (Gartner), interoperability has become a key strategic priority.

As organizations increasingly adopt Kubernetes for their cloud-native architectures, OKS stands out with a sovereign and hybrid approach:

- **A sovereign and certified infrastructure:** The SecNumCloud 3.2 public cloud ensures end-to-end protection of strategic data
- **Complete isolation:** Each enterprise benefits from a fully dedicated and secure environment, eliminating any resource sharing
- **Seamless interoperability:** While securing their sensitive workloads on OKS, organizations can leverage commodity clouds for enhanced interoperability.

### **A new experience for AI/ML workloads and critical applications**

By 2027, over 75% of AI/ML workloads will run in containerized environments, compared to less than 50% in 2024 (Gartner).

OKS simplifies container orchestration and AI/ML workload execution by providing an optimized experience with fast deployment (clusters available in minutes) and managed Kubernetes operations, ensuring a seamless and hassle-free experience.

## **OUTSCALE: Strengthening its strategic position in sovereign cloud computing**

With OKS, OUTSCALE reaffirms its commitment to delivering SecNumCloud-certified "as a Service" cloud solutions tailored to the needs of the most demanding organizations. This service differentiates itself from shared offerings, providing a sovereign, agile, and high-performance alternative for enterprises seeking to secure their data and control their cloud strategy.

### **A vision built on sovereignty, security, and performance**

*"OUTSCALE Kubernetes as a Service provides a unique and tangible response to the digital sovereignty, enhanced security, and performance demands of enterprises, software vendors, and public sector organizations. Built on our SecNumCloud 3.2-certified public cloud, OKS delivers a fully managed Kubernetes platform deployed in dedicated client environments, ensuring absolute isolation and optimal compliance with the most stringent industry requirements. This unique combination offers our clients maximum security, exceptional agility, and complete elasticity through public cloud infrastructure, allowing them to instantly scale resources to meet their business needs, even in the most demanding sectors," states **Thibaud Pietri, VP Cloud Infrastructure & Platform Services, OUTSCALE, Dassault Systèmes.***

- The service has been available since March 25.

### **About OUTSCALE**

OUTSCALE, a Dassault Systèmes brand, is the leading sovereign and sustainable operator of Trusted Experience as a Service. We revolutionize the way organizations operate with our virtual twin approach, thereby empowering public organizations and companies across industry sectors to fully harness the power of their data, to optimize their operations and processes while fostering collaboration. At OUTSCALE, we put sovereignty at the heart of our solutions, enabling our clients to have full control over their strategic information while taking advantage of our cyber-governance and cloud experience. As a responsible company, we optimize the energy efficiency of our infrastructure and encourage our clients to adopt sustainable practices.
