

Dassault Systèmes and Viettel Ink MoU to Boost Vietnam's High-Tech Sector through 3DEXPERIENCE and AI

- The strategic partnership will focus AI-driven digital design, simulation, and smart manufacturing.
- The collaboration will integrate Dassault Systèmes' 3DEXPERIENCE platform and AI/ML solutions into Viettel's innovation and digital transformation programs.
- Joint initiatives will advance R&D, talent development, and applications of AI in Viettel's priority sectors, including semiconductors, manufacturing, and telecommunications.

[Dassault Systèmes](#) (Euronext Paris: FR0014003TT8, DSY.PA) and Viettel have signed a Memorandum of Understanding (MoU) to strengthen strategic cooperation in artificial intelligence (AI), machine learning (ML), digital design, and simulation. The partnership aims to accelerate digital transformation, foster innovation, and enhance Vietnam's position in high-tech industries.

Under the agreement, Dassault Systèmes will work with Viettel AI and other Viettel subsidiaries to integrate the 3DEXPERIENCE platform and AI/ML solutions into Viettel's projects in smart manufacturing and digital transformation. The partnership will explore applications such as AI-driven product design and simulation, virtual twin, manufacturing optimization, natural language processing, robotics, and AI-powered data analytics for research and development (R&D).

A joint working framework will be established to identify and implement initiatives that strengthen Viettel's innovation pipeline and support the country's long-term industrial development. The MoU also emphasizes talent development and training, equipping Viettel's workforce with new digital and AI-driven capabilities to meet future technology needs and accelerate national upskilling.

"Dassault Systèmes has been in Vietnam for over 20 years, and our new partnership with Viettel AI marks an important step forward. Together, we will leverage Dassault Systèmes' 3DEXPERIENCE and virtual twin technologies to accelerate smarter industries, upskill high-tech talent, and drive sustainable growth," said Samson Khaou, Executive Vice President, Asia-Pacific, Dassault Systèmes.

The partnership supports Viettel's ambition to strengthen its position in strategic technology sectors, particularly semiconductors, by integrating Dassault Systèmes' 3DEXPERIENCE platform across its innovation pipeline, ranging from design and simulation to manufacturing and operations.

"Viettel's mission is to pioneer in technology and innovation for the benefit of Vietnam and its people. Working with Dassault Systèmes will enable us to apply AI and digital solutions to our strategic sectors, helping us solve complex challenges faster, create smarter solutions, and build the high-skilled talent base required to strengthen Vietnam's position in the global technology landscape," said Nguyen Manh Quy, Chief Executive Officer, Viettel AI.

This first MoU between Dassault Systèmes and Viettel marks the start of a strong partnership, with pilot projects and stakeholder engagement expected in the coming months.

Reinforcing its long-term commitment to Vietnam's digital future, Dassault Systèmes is expanding its presence through strategic collaborations that empower local innovation and support sustainable industrial growth. In 2024, Dassault Systèmes partnered with Vietnam's National Innovation Center to promote digital innovation in critical sectors like smart factories, semiconductors, and digital communications.

ABOUT DASSAULT SYSTÈMES

Dassault Systèmes is a catalyst for human progress. Since 1981, the company has pioneered virtual worlds to improve real life for consumers, patients and citizens. With Dassault Systèmes' 3DEXPERIENCE platform, 370,000 customers of all sizes, in all industries, can collaborate, imagine and create sustainable innovations that drive meaningful impact.
