OUTSCALE and Cerba HealthCare redefine the patient journey with AI

- OUTSCALE, a Dassault Systèmes brand, has entered into a partnership with Cerba HealthCare, one of France's leading medical biology laboratory groups with a strong international presence, to develop "OUTSCALE Healthcare Sovereign Platform", a centralized, sovereign solution for managing patient care across Cerba HealthCare Group laboratories.
- Hosted on the first sovereign cloud certified for HDS and qualified SecNumCloud, the solution secures patient data, optimizes workflows and the patient experience through artificial intelligence, and boosts laboratory team productivity.
- The solution, designed for deployment across Cerba HealthCare's 650 laboratories, combines artificial intelligence and digital experience.

Saint-Cloud, February 12, 2026 – OUTSCALE, a Dassault Systèmes brand, has entered into a partnership with Cerba HealthCare, one of France's leading medical biology laboratory groups with a strong international footprint, to develop "OUTSCALE Healthcare Sovereign Platform," a sovereign healthcare patient journey solution. This partnership marks a major milestone in the digital transformation of laboratories and in the large-scale implementation of sovereign digital healthcare.

On this occasion, Cerba HealthCare becomes the launch customer of "OUTSCALE Healthcare Sovereign Platform," a new healthcare solution developed by OUTSCALE and specifically designed for medical diagnostics companies. The solution is hosted on a sovereign cloud infrastructure certified for HDS and qualified SecNumCloud, placing patient data security and sovereignty at the core of the system.

A sovereign solution designed for the industrial challenges of laboratories

Companies in medical diagnostics face major challenges: growing data volumes and interoperability requirements, strict regulatory constraints, increasing patient expectations, and pressure on workforce productivity. To address these challenges, OUTSCALE has designed and deployed a powerful solution capable of managing more than 100,000 patients per day, while ensuring high levels of performance, reliability, and compliance.

"OUTSCALE Healthcare Sovereign Platform" is built on a harmonized test catalog shared across group entities and on a scalable architecture, with deployment underway across more than 650 Cerba HealthCare laboratories in production.

A new experience for patients and healthcare professionals powered by AI

For patients, the solution delivers a smooth, secure, and continuous digital journey, from appointment scheduling to results consultation. It fosters stronger trust and a consistent experience across the entire laboratory network.

For healthcare professionals, the integration of artificial intelligence technologies significantly reduces administrative workload. AI supports data structuring, prescription interpretation, and workflow optimization, allowing professionals to focus on higher-value medical tasks.

An ambitious roadmap for the healthcare services of tomorrow

This partnership is part of an ambitious, AI-enhanced roadmap aimed at progressively enriching the solution with new capabilities, including trend detection for earlier identification of chronic diseases, the development of patient virtual twins, and strengthened connections to clinical research and clinical trials, all within a controlled governance framework.

*“By partnering with Cerba HealthCare, one of the leaders in medical diagnostics, we demonstrate that healthcare sovereignty is now a reality. OUTSCALE Healthcare Sovereign Platform brings together sovereignty, innovation, and industrial performance to support secure, efficient, and patient-centered digital healthcare,” said **Philippe Miltin, CEO of OUTSCALE, a Dassault Systèmes brand.***

*“The deployment of this solution addresses both the need to secure our digital assets and our ambition to offer an enhanced patient experience. This new, more personalized patient experience makes it possible to build long-term relationships with patients by providing tailored support throughout the care pathway. Finally, this solution is a key pillar in advancing prevention for the benefit of patients and actively contributing to the evolution of our healthcare system,” said **Julien Samson, CEO of Cerba HealthCare.***

OUTSCALE strengthens its strategic position in digital healthcare

With this new solution, OUTSCALE expands its portfolio of sovereign cloud solutions and confirms its ambition to become a leading player in digital healthcare. By combining certified infrastructure, regulatory expertise, industrial performance, and AI-driven innovation, OUTSCALE supports healthcare stakeholders for the benefit of patients.

ABOUT Cerba HealthCare

Cerba HealthCare, a leading player in medical biology, aims to support the evolution of healthcare systems towards greater prevention. It draws on nearly 60 years of expertise in medical biology to better assess the risk of disease development, screen for and diagnose pathologies at an earlier stage, and optimise the effectiveness of treatments by personalising them. Every day, across five continents, the Group's 15,000 employees support the transformation of medicine, driven by the same deep conviction: advancing diagnosis means advancing health. Cerba HealthCare, enlightening health.

ABOUT OUTSCALE

OUTSCALE, a Dassault Systèmes brand, is the leading sovereign and sustainable operator of Trusted Experience as a Service. We revolutionize the way organizations operate with our virtual twin approach, thereby empowering public organizations and companies across industry sectors to fully harness the power of their data, to optimize their operations and processes while fostering

collaboration. At OUTSCALE, we put sovereignty at the heart of our solutions, enabling our clients to have full control over their strategic information while taking advantage of our cyber-governance and cloud experience. As a responsible company, we optimize the energy efficiency of our infrastructure and encourage our clients to adopt sustainable practices.
