

# CST STUDIO SUITE - ANTENNA PLACEMENT

## SIMULIA COURSE DESCRIPTION

**Level:** Advanced  
**Products:** CST Studio Suite  
**Disciplines:** Electromagnetics

**Audience**  
Electromagnetic Simulation Analysts and Antenna Designers

### Why take this course?

Throughout this course, you will become familiar with topics like antenna placement, antenna-to- antenna coupling, antenna matching network and radiation hazard. Particular attention is given to the generation and usage of near/far-field sources in the context of the Hybrid Solver Task.

### What will you learn?

Upon completion of this course you will be able to:

- Use the Integral Equation and Asymptotic Solvers.
- Use the Hybrid Solver to perform Antenna Placement analysis.

### Explore Your Learning Options

|                           |                                                                                                                                          |                                                |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| <b>Live Sessions</b>      | Engage in Real-Time, interactive group workshops guided by experts. Learn and collaborate live in your preferred language and time zone. | <a href="#">Join a live session</a>            |
| <b>On-Demand Learning</b> | Access expert-designed courses anytime, anywhere. Perfect for independent learners looking to build skills on their schedule.            | <a href="#">Start Learning Now</a>             |
| <b>Private Training</b>   | Exclusive, tailor-made sessions designed to meet your team's unique goals with expert guidance.                                          | <a href="#">Contact Us for Custom Training</a> |

**Gain hands-on experience and master real-world workflows through guided, practical training sessions.**

Model and analyze electromagnetic behavior for advanced design validation and system optimization.
