

GETTING STARTED WITH AUTOMATION AND OPTIMIZATION

SIMULIA COURSE DESCRIPTION

Level: Fundamental

Products: 3DEXPERIENCE

Disciplines: Automation; Design Exploration & Optimization

Audience

This course is intended for the following roles:

- Multidisciplinary Optimization Engineer
- Simulation Collaborator
- Simulation Process Engineer

Why take this course?

This interactive course is intended for on-demand learning and is the prerequisite for many process automation and design optimization courses (if you are new to using the 3DEXPERIENCE platform). Using automation apps requires a baseline knowledge of how to log in to the platform, use 3DSearch to find and filter data, manage maturity of the data for collaboration. The 3DEXPERIENCE native (desktop) apps and web interfaces (including dashboards) will be introduced in this course.

What will you learn?

Upon completion of this course, you will be able to:

- Log in to the 3DEXPERIENCE platform
- Search for and find your data using native and dashboard interfaces
- Manage maturity of data, track revisions, and delete example data
- Configure preferences and settings

Explore Your Learning Options

Live Sessions	Engage in Real-Time, interactive group workshops guided by experts. Learn and collaborate live in your preferred language and time zone.	Join a live session
On-Demand Learning	Access expert-designed courses anytime, anywhere. Perfect for independent learners looking to build skills on their schedule.	Start Learning Now
Private Training	Exclusive, tailor-made sessions designed to meet your team's unique goals with expert guidance.	Contact Us for Custom Training

Automation can seem complex before you see it in action. This course takes you through the essential steps of connecting data, managing maturity, and setting preferences in the 3DEXPERIENCE platform. You leave ready to explore process automation and design optimization with clarity and confidence.
