

CONNECTING CST TO THE 3DEXPERIENCE PLATFORM

SIMULIA COURSE DESCRIPTION

Level: Fundamental

Products: 3DEXPERIENCE; CST Studio Suite

Disciplines: Electromagnetics

Audience

This course is intended for the following roles:

- Electromagnetics Analyst
- Antenna Placement Electromagnetics Engineer

Why take this course?

Throughout this course you will become familiar with the various ways of launching CST Studio Suite from within the 3DEXPERIENCE platform, the platform interface and how to perform basic tasks such as modeling, simulation setup, and reviewing the results. The course also discusses native and dashboard apps on the platform such as Simulation Manager and Optimization Process Composer. The discussion of these is tailored to electromagnetics simulations. The course also considers the creation of postprocessing templates and uploading them to the platform for DOE analysis.

What will you learn?

Upon completion of this course, you will be able to:

- Launch CST Studio Suite from the 3DEXPERIENCE platform
- Understand the different connection interfaces

available for CST Studio Suite

- Use Simulation Manager and Optimization Process Composer for electromagnetics simulations

Connector courses help engineers link legacy tools with the 3DEXPERIENCE platform.

You integrate CST electromagnetic simulations into the 3DEXPERIENCE platform to unify data and model management.
