AI FOR ENTERPRISE KNOWLEDGE

Use industrial AI and AURA, our Virtual Companion, to make enterprise data accessible to everyone, helping employees uncover insights anytime — no data science expertise required.

How AURA Makes Enterprise Knowledge Accessible Across Your Business

Greater access to **business data**

Faster **information retrieval**

More time for **higher-value work**

Put the right answers to work, 24/7

Empower every employee to confidently ask questions and make evidence-based decisions without relying on data experts.

Preserve the context of your existing industrial data

AURA works natively within the **3D**EXPERIENCE® agentic platform, giving every employee conversational access to insights from product structures, requirements and bills of materials (BOMs).

Spot quality issues and root causes sooner

Trace quality issues back to their root cause faster. AURA connects the dots across your enterprise to flag emerging issues early enough for teams to intervene.

Discover how to apply industrial AI to enterprise knowledge, measure its impact and turn proven results into lasting capabilities.
