AI FOR PROJECT MANAGEMENT

Use industrial AI and AURA, our Virtual Companion, to create actionable project plans grounded in product data, requirements and past project knowledge.

Give Your Entire Project the AURA Advantage

More **productivity per project**

Faster **risk identification**

Faster **project planning and execution**

See progress in real time

Ask AURA about project progress, bottlenecks and priorities that matter, without manually pulling information.

Identify risks and delays earlier

Turn your static project plan into a living virtual twin to track real-time progress and flag risks early.

Make past knowledge work for you

Reuse the knowledge and lessons learned from past projects so every new project doesn't have to start from scratch.

Discover how to apply industrial AI to project management, measure its impact and turn proven results into lasting capabilities here.
