

Hyundai Heavy Industries to Deploy Dassault Systèmes' 3DEXPERIENCE Platform

Hyundai Heavy Industries Selects Marine & Offshore Industry Solution Experiences for Design and Engineering of Offshore Structures

VELIZY-VILLACOUBLAY, France — April 24, 2014 — [Dassault Systèmes](#) (Euronext Paris: #13065, DSY.PA), the 3DEXPERIENCE Company, world leader in 3D design software, 3D Digital Mock Up and Product Lifecycle Management (PLM) solutions, today announced that the Offshore & Engineering division of Hyundai Heavy Industries (HHI) has chosen to deploy Dassault Systèmes' 3DEXPERIENCE platform and its marine and offshore industry solution experiences.

HHI is determined to maintain its technology leadership position through differentiation and innovation in a highly competitive environment. Recognizing that the sheer complexity of large offshore development projects requires an integrated collaborative design, engineering and project management solution, HHI has turned to Dassault Systèmes' 3DEXPERIENCE platform. The company's 3DEXPERIENCE strategy and technologies will enable it to produce offshore facilities with not just *better* quality and performance, but with the industry's *best* quality and performance.

HHI thoroughly evaluated all major industry vendors in its search for the right partner and technology. In the end, the company knew it needed a solution that was able to manage large and complex models with an incredibly large number of parts. The result of that comprehensive vendor review and selection process, Dassault Systèmes and 3DEXPERIENCE, was announced at a presentation held by HHI's Offshore & Engineering division for over 80 key personnel and guests.

"HHI will leverage Dassault Systèmes' comprehensive and integrated industry solution experiences to design and plan complex projects, ensuring on time and on budget delivery," said Monica Menghini, Executive Vice President, Corporate Strategy, Industry & Marketing, Dassault Systèmes.

Dassault Systèmes' 3DEXPERIENCE platform will provide HHI with offshore-specialized solutions, including "On Time To Sea" and "Designed For Sea" industry solution experiences. "On Time To Sea" provides integrated program management that allows companies to plan and manage the development of complex offshore structures with improved time to market and on budget delivery. "Designed For Sea" connects requirements, regulations, and offshore engineering disciplines throughout the design process to reach design excellence. High quality preliminary design is achieved with enhanced productivity and cost effectiveness by evaluating and validating design alternatives using real-time 3D simulation and analysis.

“We’re very proud of the fact that Hyundai Heavy Industries’ Offshore & Engineering division has selected the 3DEXPERIENCE platform and our industry solution experiences,” said Sylvain Laurent, Executive Vice President, Asia Pacific Market and Global Business Transformation Dassault Systèmes. “Dassault Systèmes is very focused on customers’ needs. We’ve seen the marine and offshore market’s rapid evolution in recent years and its growing focus on offshore facility development. We’ve carefully paralleled that evolution, providing solutions that address customers’ challenges in this important segment.”

About Dassault Systèmes

Dassault Systèmes, the 3DEXPERIENCE Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes’ collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 190,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com.

CATIA, SOLIDWORKS, SIMULIA, DELMIA, ENOVIA, GEOVIA, EXALEAD, NETVIBES, 3DSWYM and 3D VIA are registered trademarks of Dassault Systèmes or its subsidiaries in the US and/or other countries.
