Capgemini and Dassault Systèmes Sign an Innovative Services Partnership

Capgemini becomes Dassault Systèmes PLM solutions integrator

Paris, 21 November 2011– Dassault Systèmes (Euronext Paris: #13065, DSY.PA), a world leader in 3D and Product Lifecycle Management (PLM) solutions; and Capgemini, a world leader in IT consulting, technology services and outsourcing, today announced the signature of an alliance around the integration of Dassault Systèmes' PLM Version 6 solutions. The partnership will allow Capgemini to significantly widen its PLM integration offering for current clients in different industries such as aerospace, defense and automotive, as well as transport and energy. Capgemini intends to provide its clients in these sectors with the most innovative PLM solutions, to enable faster, more efficient transformation of their industrial processes.

This collaboration will accelerate the implementation and deployment of PLM solutions based on the value of Dassault Systèmes' Version 6, an open online platform allowing an expanded user community to create, collaborate and experience products virtually in a 3D environment, throughout the innovation cycle, ensuring IP protection. It will also strengthen the capacity to integrate PLM technologies in more complex client environments, such as ERP applications, or proprietary application development.

Patrick Longuet, Capgemini France Aerospace & Defense, explains, *"Through this partnership, we are aiming to position ourselves as European leader in the PLM solution integration market in different sectors, in particular aerospace and defense. Our unique expertise as a global integrator, will be enhanced with greater PLM skills, plus expertise around Dassault Systèmes solutions to better meet clients' needs. At first, this global partnership will focus on France and Europe."*

Philippe Besse, Vice President, Industry Services EMEA at Dassault Systèmes, says, *"We are proud to be able to sign this strategic partnership with a tier one European technology services player, which has widely demonstrated its skill and professionalism in consulting as well as systems integration. This will undoubtedly act as a catalyst for a wider integration of our PLM solutions for clients, while providing them with greater project and process management capabilities, and expertise around our PLM solutions."*

About Capgemini

With more than 115,000 people in 40 countries, Capgemini is one of the world's foremost providers of consulting, technology and outsourcing services. The Group reported 2010 global revenues of EUR 8.7 billion. Together with its clients, Capgemini creates and delivers business and technology solutions that fit their needs and drive the results they want.
