

INDUSTRIAL EQUIPMENT SINGLE REQUIREMENT & PROJECT SOURCE

Ease Product Requirement and Project Tracking

**VISIBILITY, CONTROL, AND
SYNCHRONIZATION WHICH
ANSWER TO HIGH LEVEL
REQUIREMENTS**

Single Requirement & Project Source for the Industrial Equipment industry delivers a global project and product management solution that supports real-time decision-making and on-time on-budget delivery.

Single Requirement & Project Source delivers a clear understanding of deliverables and responsibilities for all project stakeholders in your global organization. Project milestones and resources are assigned and executed in line with company standards and best practices. You keep track of product specifications from the earliest design stages, thereby reducing the risk of having to refuse products that do not fulfill your customers' requirements. *Single Requirement Source* provides managers and team members with real-time project monitoring using business dashboards and reports that accelerate decision-making. As a result, products are delivered in a timely manner, with end-to-end traceability and responding to high requirements helping your company meet its targeted performance objectives.

Single Requirement & Project Source is available on premise and on cloud.

INDUSTRY CHALLENGES

- How do we ensure requirement traceability across our global organization?
- How can we reduce the risk of missing delivery deadlines because of non-compliant products?
- How do we make sure all stakeholders have a clear view of their responsibilities and milestones?
- How do we ensure information reuse?
- How can we make faster decisions and ensure they are based on up-to-date project information?

SOLUTION HIGHLIGHTS

- Delivers clear project milestones and expectations across the ecosystem.
- Provides traceability of product specifications, decisions, resources, and responsibilities.
- Real-time project monitoring with up-to-date business dashboards and reports that aggregate information from multiple sources
- Automatic workflow management
- Reusable templates that comply with company standards.

SOLUTION VALUES

- Improved on-time and on-budget product delivery.
- Faster and more accurate decision-making based on most current information.
- Improved on-time, on-specification delivery of complex customer orders.
- Unique view of project and product information across the ecosystem.
- Improves first-time-right product manufacturing and increases customer satisfaction.
- Better risk-management through increased visibility.
- Consistency and compliance through reusable templates.

SINGLE SOURCE FOR SPEED

Single Requirement & Project Source is part of *Single Source For Speed*, a Dassault Systèmes Industry Solution Experience based on the **3DEXPERIENCE®** platform that manages the end-to-end multi-disciplinary product development process by delivering a unified design experience to industrial equipment companies that need to address their complex manufacturing challenges. With *Single Source For Speed*, project stakeholders have social networking, design and business applications that facilitate decision-making, reduce costs and accelerate time to market.

Our 3DEXPERIENCE® platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE® Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 190,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
