

HOW TO LIST YOUR PRODUCTS IN BIOVIA® ACD OR BIOVIA® SCD Datasheet

WHY PARTICIPATE

The BIOVIA Available Chemicals Directory (BIOVIA ACD) is the industry-leading structuresearchable consolidated collection of commercially available chemicals from across the globe. BIOVIA ACD also includes biologics, assays, kits, proteins, peptides, and polymers, as well as other non-structurable products. BIOVIA ACD is trusted a other supplier database worldwide and has been the de facto standard in pharmaceutical, biotechnology, chemical and agrochemical companies worldwide for over 35 years.

The BIOVIA Screening Compounds Directory (BIOVIA SCD) complements BIOVIA ACD with almost 12 million screening compounds, making it one of the most comprehensive highthroughput screening collections available today. If you are not sure which database is appropriate for your product listing, please contact us at List_custom_BIOVIA_ACDSuppliers@3ds.com and BIOVIA will review all the submitted information and determine to which database your catalog will be included. Terms and Conditions will be signed when the catalog list is uploaded to the BIOVIA supplier portal.

REQUIREMENTS

We must receive supplier product data electronically. Preferred electronic formats are:

- BIOVIA® SDfile
- BIOVIA® RDfile
- Microsoft® Excel® spreadsheet
- Microsoft® Access® database
- Oracle® tables (as Oracle export file)
- Delimited ASCII text files

When submitting electronic data, please send a complete representation of all your product data (i.e. the same data you would provide in a printed catalog) including laboratory equipment.

The minimum information we require for every product is a catalog number, chemical name and/or structure (in MDL molecule file format), availability data for each product, and quantity-unit-price. We do ask however that you send as much information as possible for each of your products. For example:

- Product name
- Catalog number (SKU if available)
- Structure, for structurable product lines
- Synonyms
- CAS Registry Number
- Package quantity | Package units | Price
- GHS data for relevant products
- SDS url links to website, if available
- Purity
- Specification | Grade
- Hazard, Risk and Safety data
- Chemical/Physical properties (including units), such as Melting Point, Boiling Point, Density, Refractive Index, Optical Rotation, Isotopic Enrichment, LogP
- Shipping data such as Ships By, EHS data
- Antibody data (clone, cell line, host, etc.)
- Other relevant data associated with the compound

This data should be stored in separate fields, in one of the preferred electronic formats. For biologics there will not be structures, physical properties such as melting points, boiling points, etc. Please include all relevant data associated with the product in separate data fields.

Please provide your complete company contact information, as you would like it to appear in the database. Include global distributors if you have them, along with their address, phone/fax, email address and URL. You must have a working website before your product list will be included in ACD.

We will also need your direct contact information for future communications so that we can keep your product listing up-to-date and provide feedback on data related issues.

Please submit your electronic product file to List_custom_BIOVIA_ACDSuppliers@3ds.com.

TIPS FOR SUBMITTING SUPPLIER DATA:

1. We prefer that you provide full product updates for each submission to BIOVIA ACD. However, if you do provide supplemental product updates, clearly indicate which products have been dropped and/or revised, or only send the new/changed records in a single file.
2. Include persistent catalog number identifier s for all your products. Package-specific catalog numbers are preferred. Catalog numbers are required, and must remain consistent for each release. Reuse of catalog numbers will result in delay of processing the update.
3. All data fields should contain just one type of data, e.g., don't include purity data in the product name field.
4. Please make sure that your quantity, unit and price data are in a consistent format. This data must be in separate fields rather than combined in one field.
5. Please bear in mind that clean and accurate data is critical to ensure that it appears in the latest release.

LEARN MORE

Our 3DEXPERIENCE® platform powers our brand applications, serving 11 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE Company, is a catalyst for human progress. We provide business and people with collaborative virtual environments to imagine sustainable innovations. By creating 'virtual experience twins' of the real world with our 3DEXPERIENCE platform and applications, our customers push the boundaries of innovation, learning and production.

Dassault Systèmes' 20,000 employees are bringing value to more than 270,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com.
