SUMMARY

We are proud to offer a variety of courses to meet your organization's needs, ranging from navigation basics to advanced technical courses. Customized courses can be designed to meet your organization's specific needs. For more information on customization, please contact your Account Manager.

Delivery Methods:

- **Instructor-Led Training:** Facilitated by an instructor, this training takes place at your location or through a virtual classroom. Onsite courses offer hands-on exercises to enhance the learning experience. In remote classes, hands-on exercises are assigned as homework, rather than during class time.

INSTRUCTOR-LED COURSES

AUTHORING AND EXECUTING RECIPES WITH BIOVIA COMPOSE/CAPTURE

This course teaches new users of BIOVIA Compose/Capture how to create reusable recipes that can be executed in a laboratory environment. Participants will learn to view existing recipes, generate recipes from scratch or from existing recipes, approve recipes and assign them for execution, and execute recipes that have been assigned to them.

Topics	Details
<ul style="list-style-type: none">• Create recipes from reusable building blocks of process stages, operations and actions• Create parallel processes and repeatable processes• Execute a recipe electronically• Manage libraries of process elements and recipes• Integrate Compose with BIOVIA Workbook	<p>Onsite/ Remote Training: 1 Day</p> <p>Level: Beginner</p> <p>Prerequisites: None</p>
