# TIME STUDY ANALYST
3DEXPERIENCE MANUFACTURING & PRODUCTION ROLE

CALCULATE OPERATION TIMES USING CORPORATE OR INDUSTRY STANDARDS

Time Study Analyst delivers the ability to assign accurate times for planned manual operations using proprietary or standard time measurement data cards.

Time Study Analyst enables companies to define custom time analysis data cards for use in time analysis studies. Detailed data for time studies is based on customized methods for assembly tasks. Companies can capture proprietary time analysis data for the processes executed by their workers. This data can be used to create custom codes and time values that will be utilized when performing further time analysis studies.

Perform time analysis based on industry standards

Planners are able to assign accurate times for planned manual operations using standard time measurement data cards. When standard times are applied to manual operations, it gives an accurate measurement, early in the planning stages, of the time required to perform a series of tasks.

Time analysis based on company standards

Many companies have invested significant time and effort in capturing time requirements for manufacturing and assembly processes in order to make their time analysis more accurate. Time Study Analyst lets planners use customized data cards in addition to the time measurement standards.

Reduced time and effort to create time studies

Sifting through huge databases of time-management data to find details for accurate Standard Time Management (STM) studies can be daunting. With an easy-to-use breakthrough interface, new users quickly find the data they need and become proficient in a short time.

Time studies: faster, simpler and more accurate

Tools for increasing efficiency with customized data cards

Role Highlights

- Groundbreaking **3D**EXPERIENCE® platform
- Perform time analysis using standard or custom data cards
- Editor for authoring customized data cards
- Graphical preview of customized data cards
- Re-use corporate best practices

Our **3D**EXPERIENCE® platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the **3D**EXPERIENCE® Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 190,000 customers of all sizes in all industries in more than 140 countries. For more information, visit **www.3ds.com**.
