# LEARN ANYWHERE, IMPROVE EVERYWHERE

INDUSTRIAL EQUIPMENT

# Improve Visibility across Global Operations

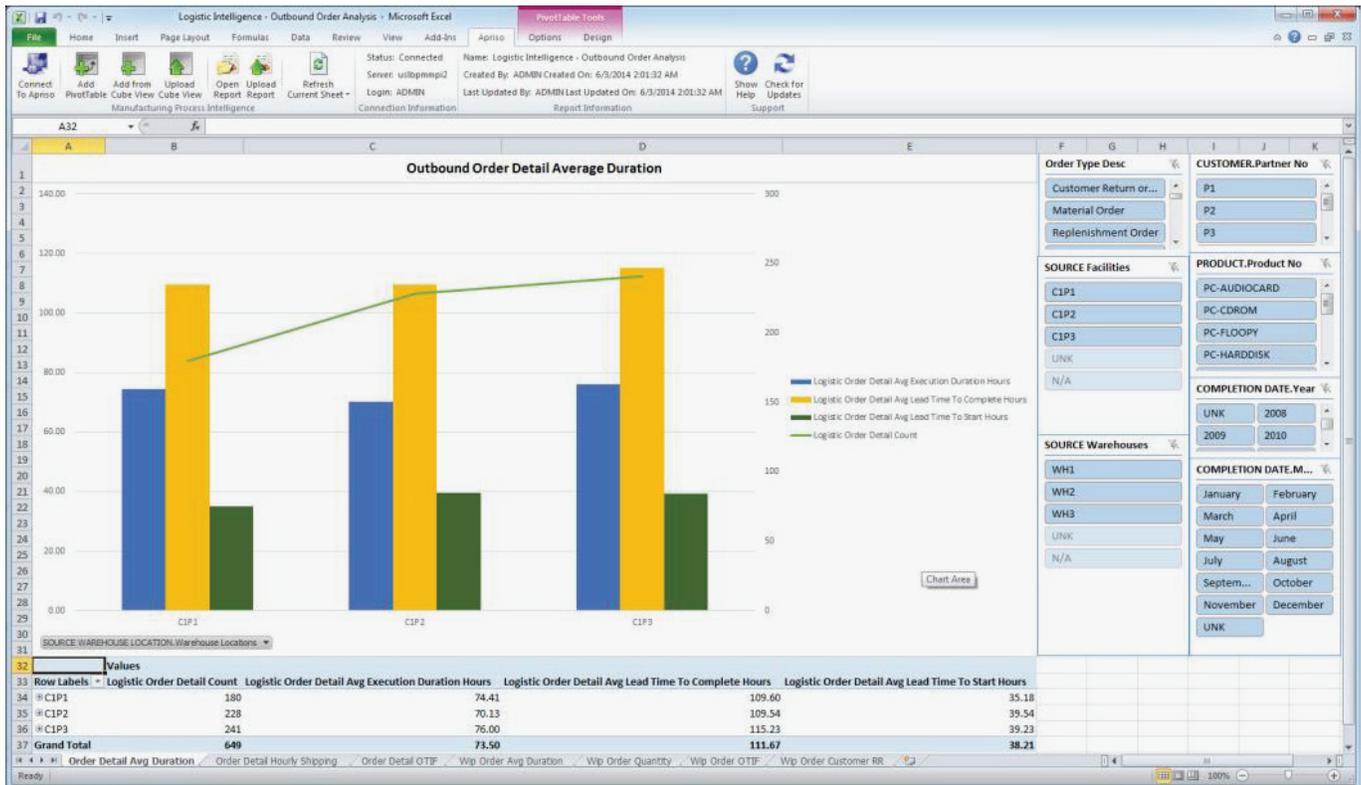

*DELMIA's Learn Anywhere, Improve Everywhere for the Industrial Equipment industry improves visibility across global operations by making the right information quickly available to all levels of the enterprise.*

DELMIA's Learn Anywhere, Improve Everywhere solution improves visibility and control of manufacturing operations, both in and across plants, to improve decision making and alignment with business performance targets. Information is made available quickly, with sufficient granularity and context to empower managers to make better decisions, faster. Able to mine data from disparate system sources and normalize into information, it renders contextualized intelligence to shop floor workers, managers and executives across the global operations organization.

Manage across global operations using consistent KPIs

Real-time visualization of operational status and performance metrics

## INDUSTRY CHALLENGES

- How to improve manufacturing operational efficiencies?
- How to accelerate New Product Introduction (NPI) programs on a global scale?
- How to ensure plants are reporting operations performance using standard metrics and unfiltered data?
- How to cost-effectively provide Business Intelligence (BI) support for global manufacturing operations?
- How to stay connected while on the road?

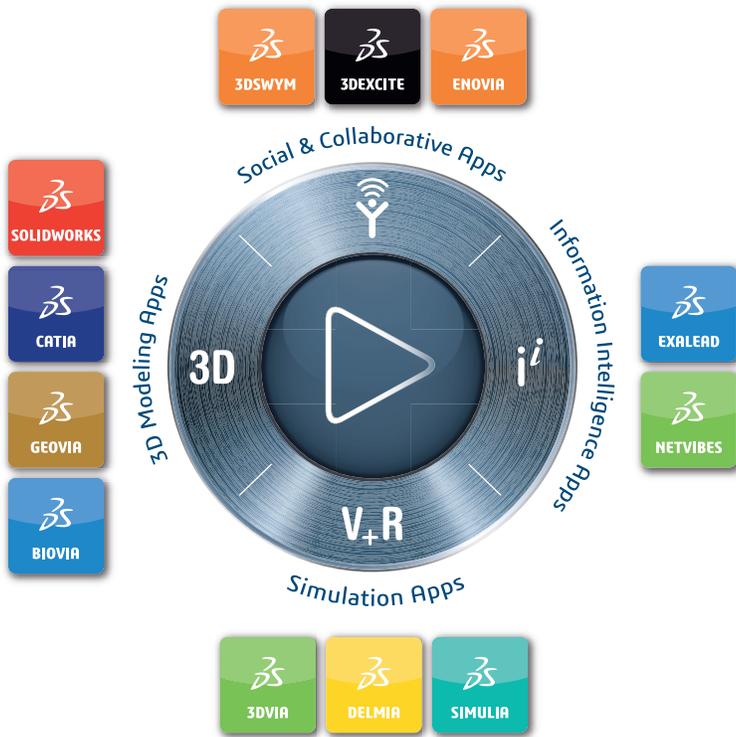

## SOLUTION HIGHLIGHTS

- Timely, consistent and unified views of your manufacturing operations to facilitate performance comparisons across locations
- Closed-loop framework for rapid deployment and centralized management of key company metrics
- Out-of-the-box analytics, KPIs, dashboards and reports
- Supports plant performance reporting and centralized intelligence for plant-to-plant analysis
- Fact-based, contextualized data delivered to both fixed and mobile devices

## SOLUTION VALUES

- Accelerates operational adjustments and continuous improvement actions based on timely, accurate and consistent data
- Improves agility and responsiveness by providing near real-time performance intelligence to all functional levels on-demand
- Increases product quality through consistent and coherent analysis of all shop floor processes
- Accelerates deployment and acceptance by manufacturing professionals, increasing overall return on investment
- Drives complex collaborative decision support scenarios tailored for manufacturing operations

**Our 3DEXPERIENCE® platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.**

Dassault Systèmes, the 3DEXPERIENCE® Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 190,000 customers of all sizes in all industries in more than 140 countries. For more information, visit [www.3ds.com](http://www.3ds.com).
