LEAN PERFORMANCE MANAGEMENT

TRANSPORTATION & MOBILITY

Increase Visibility into Global Manufacturing Operations

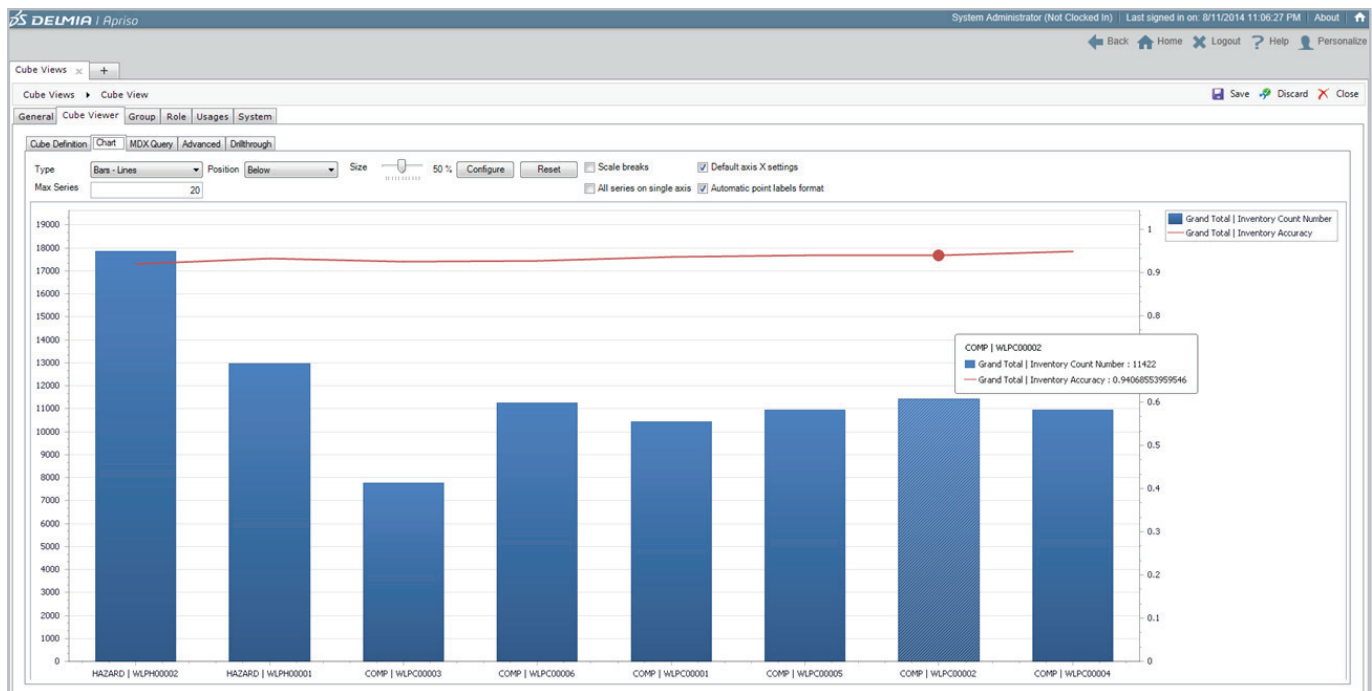

DELMIA's Lean Performance Management solution for the Transportation & Mobility industry improves visibility across global operations.

DELMIA's Lean Performance Management solution provides a powerful, intuitive platform to improve visibility into manufacturing operations, both in and across plants, for quality decision making and alignment with business performance targets. Data is mined from disparate system sources, normalized into information and rendered into contextualized intelligence for each plant across the enterprise. Increased visibility into global manufacturing operations helps to improve performance across plants, including: New Product Introduction programs, non-conformance identification and resolution, and the implementation of best practices.

Graphic-rich visualization of operations performance

Deploy metrics and analysis across all sites globally

INDUSTRY CHALLENGES

- How to detect non-conformances earlier and contain them globally?
- How to ensure plants are reporting operations performance using standard metrics and unfiltered data?
- How to accelerate New Product Introduction programs on a global scale?
- How to cost-effectively provide Business Intelligence support for global manufacturing operations?
- How to keep Operations Executives connected while traveling?

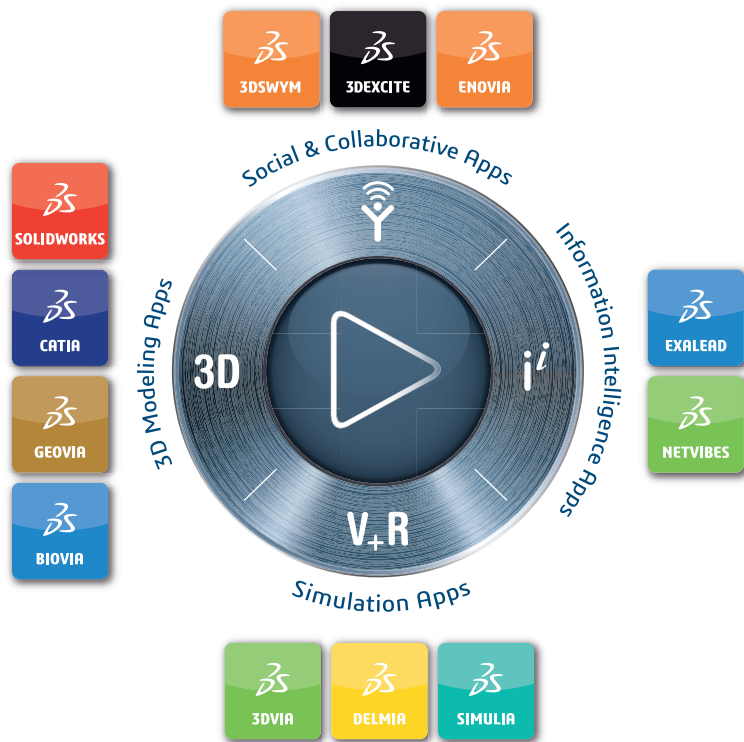

SOLUTION HIGHLIGHTS

- Monitors initial production ramp-up performance across all sites, quickly enhancing processes and re-deploying in a matter of hours
- Industrialized processes from pilot launch are easily translated to local languages
- Enables closed-loop digital collaboration processes with engineering
- Measures operations performance with timely and unfiltered views of key metrics at any time, for any duration and across any number of plants
- On-demand, self-service manufacturing intelligence
- Rich visualization tools delivered on mobile devices

SOLUTION VALUES

- Reduces time-to-market and time-to-volume on a global scale
- Expands new product launch activities to plants in different regions
- Boosts decision support with fact-based, contextualized data that is available on the shop floor
- Accelerates problem resolution cycles reducing both cost to and potential risk to brand reputation
- Improves product quality through consistent and coherent analysis of all shop floor processes
- Uninterrupted visibility of operations improves agility and responsiveness

Our **3DEXPERIENCE®** platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the **3DEXPERIENCE®** Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 190,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
