

DraftSight 2020 Beta Installation and Activation Instructions

General Notes:

In this document, please find the step-by-step instructions to install and activate the DraftSight 2020 Beta on MAC OS.

DraftSight 2020 Beta is the pre-production version for quality evaluation. It is more stable than the Alpha version but may contain critical issues. Therefore, it should never be used in a production environment or to modify production data. We strongly recommend you to install the DraftSight 2020 Beta on a non-production or secondary computer that are not business critical.

Installation:

After you download the "*DraftSight.pkg*" file from the Beta download page, double click on it and the file will extract and initialize.

1) Introduction

2) Destination select

0	🥪 Install DraftSight
	Standard Install on "Macintosh HD"
Introduction Destination Select Installation Type Installation Summary	This will take 1.4 GB of space on your computer. Click Install to perform a standard installation of this software on the disk "Macintosh HD".

NOTE: To use your lic Draftsight before you	ense on another computer, you must deactivate uninstall.
	< Back Finish

If you already have the previous version of DraftSight 2019 installed and activated in your machine, the installer will first remove some old files and uninstall the previous version of DraftSight. Then, it will automatically install the new version of DraftSight 2020 Beta on your machine. In addition, you may get the "**Migration Assistance**" dialog box below. Select the settings you would like to migrate from your previous version of DraftSight to the new DraftSight 2020 Beta, press "**OK**" to proceed.

Migrate settings from:	DraftSight 2019.2 (19.2.3115)
