

DraftSight 2016 SP1 Release notes

Resolved Issues in SP1 (April 2016):

#	Description
633303	Adds the ability to open different drawing files in the same session of DraftSight or to launch them in separate sessions.
736751	Corrects the wrong wording issue in German help documentation (Was: AnUrsprungspositionEinfügen => Now: ANQUELLPOSITIONEINFÜGEN).
903525	Fixes the DraftSight Free version customized installation location path failure problem.
915153	Improves the Find and Replace command behavior after consecutive times of text replacement.
927942	Improves the text note masking background behavior and consistency when viewing and printing.
927991	Removes the repeating Qt5Core.dll warning dialog box when opening a drawing file.
932952	Improves stability of DraftSight when applying customized command in Classic Default and Ribbon workspaces.
932954	Fixes the duplicated entries issue for customized command in Ribbon workspace on each restart.
938922	Corrects the auto-loading of LISP files not working problem.
