

7 Reasons Why

SmarTeam customers upgrade to the 3DEXPERIENCE® platform on the Cloud

Keeping pace with changing market and customer needs requires more agility and collaboration than ever before.

To meet this challenge, SmarTeam customers are upgrading to the **3DEXPERIENCE** platform on the Cloud.

Here are the top seven reasons why:

1

Connect product teams and data on a cloud-based platform

Manage your product data in an easy-to-deploy, secure and scalable cloud environment with turnkey PLM capabilities. Reduce IT infrastructure costs and ensure teams always access the latest information to accelerate innovation.

Access product data anytime anywhere from any device

Explore and edit product structures, perform multi-CAD design markups, view and resolve issues, participate in key projects, and manage the engineering definition, all from any browser-enabled device.

2

3

Increase agility in a data-driven environment

Secure your **CATIA V5** and **SOLIDWORKS** investments while upgrading from product data management to a connected, organized, data-driven innovation platform.

Collaborate more effectively

Improve the ideation process by extending from structured collaboration to social thought communities, all referencing a common product definition.

4

5

Do more than manage data

Take advantage of dashboard views that provide insights into product and project data to enable rapid, informed decision-making. Manage business innovation processes more effectively by connecting product data to projects, tasks, issues and change actions.

Extend the value of existing design data

Enable stakeholders outside engineering and design departments to access, review and contribute to designs in real-time.

6

7

Meet the needs of today and the future

Readily access a portfolio of industry-leading design, simulation, manufacturing and business intelligence apps to meet your evolving needs.

Your market, customers and competitors do not stand still. The best time to move to the **3DEXPERIENCE** platform is now.
