

GEOVIA MINEX FOUNDATION

(3 DAYS)

The MINEX™ Foundation three-day course is designed for all new users. The course will provide novice users, whether they are geologists or engineers with a good foundation of key workflows. It covers concepts and procedures that will allow the user to perform basic functions in the system, and will serve as a basis for more advanced training.

COURSE PREREQUISITES

Before taking this course, you require the following:

- Knowledge of Windows® 2000, XP, Vista® or Windows 7 Operating System
- Knowledge of file management
- Knowledge of ASCII format files and Microsoft® Excel®
- Basic understanding of mining practices

The MINEX menu structure and graphical user interface (GUI) are similar to most Windows-based packages and therefore a basic knowledge of the Windows operating system and environment is necessary.

EXPECTED OUTCOMES

Upon completion of this course, you will be able to accomplish the following:

- Installation
- Project set up and maintenance
- Use Minex interface and associated tools
- Customise the Minex graphical interface and icons
- View 3D graphical environment

- In-depth understanding of the Minex data types and concepts
- Digitise/edit strings
- Import and export data
- Use the basic components of the system for setting up and viewing data
- Understand the data types, concepts and file structure of Minex
- Create new user data for points, lines and surfaces
- Display and interrogate string and borehole data in 3D
- Understand the concepts of grids and generate them
- Understand the concepts of triangles and generate them
- Generate simple volume calculations between surfaces
- Create simple plots in plan and section
- Basic reporting
- Printing & plotting techniques

If a desired expected outcome is not listed above, please contact us to learn more about how we can tailor training to meet your needs.
