

GEOVIA WHITTLE STRATEGIC MINE PLANNING

(3 DAYS)

The WHITTLE™ Strategic Mine Planning course is a three-day course, designed for new users of WHITTLE (Geologists and Engineers) to develop an understanding of the principles of strategic mine planning and practical application of WHITTLE software.

COURSE PREREQUISITES

Before taking this course, you require the following:

- Knowledge of Windows® 2000, XP, Vista® or Windows 7 Operating System
- Knowledge of file management
- Basic knowledge of Excel
- Basic Exploration and mining knowledge
- Basic knowledge of SURPAC, GEMS, or another mine planning package

The WHITTLE menu structure and graphical user interface (GUI) are similar to most Windows-based packages and therefore a basic knowledge of the Windows operating system and environment is necessary.

EXPECTED OUTCOMES

Upon completion of this course, you will be able to accomplish the following:

- Understand the theory and principles of strategic mine planning.
- Create pit shells that can be used to create economic pit designs.
- Optimize & sequence pushbacks to improve project economics.
- Define cut-off grade and stock piles strategies to enhance your project's value.
- Analyze options for mill capacity and mining throughputs, and understand their influence on the economics of your mining project.
- Export results for use in downstream design and scheduling.

If a desired expected outcome is not listed above, please contact us to learn more about how we can tailor training to meet your needs.
