

3D SYSTEMS

3D Scan, Design, Print & Inspection Solutions

- **Products: Comprehensive Professional and Production 3D Printer Portfolio**
 - Industry's largest portfolio of 3D printing solutions powered by seven print engines and 120+ performance materials, including metals, engineering plastics and elastomerics
 - Solutions range from the professional grade to high-performance, MJP, CJP, SLA, SLS, DMP, and Figure 4.
 - On Demand Manufacturing service uses 3D printing and traditional methods for everything from one-off part orders to large-scale production runs
- **Benefits:**
 - Quickly produce durable, functional parts straight from CAD data for immediate end use, testing, concept presentation, and more
 - Reduce product design windows and costs, minimize tooling costs, accelerate time to market
 - Free design from the constraints of traditional manufacturing and produce parts with unlimited complexity
