

“From innovative ideas to perfect products”

• cenitCONNECT Integration for for 3DEXPERIENCE

Multi bi-directional exchange of the relevant product data between Version 6 and SAP

- Scalable solution for small, medium and large customers
- Process driven system integration with bi-directional interchange of IP
- Release and change objects like Maturity, Action, Engineering Record, Change Master, Process ID, Project ID
- Versioning and lifecycle synchronization
- Location of “control” concept
- Rule based behavior, no end user UI required for most activities

- **FASTTRIM**
Trimming applications: Laser cutting, routing, water jet trimming, etc.
- **FASTTIP**
Point-to-point robot applications: Automated riveting and multi-layer drilling
- **FASTCURVE**
3D contour machining: Trimming, sealing, gluing, overlaying welding, etc.
- **FASTSURF**
3D surfacing processes: Painting, plasma coating, shot peening, gluing, grid/sand blasting, polishing, ultrasonic testing, etc.
- **FAST4AXES**
Wire cutting EDM: Pre-defined and re-usable machining strategies for 2-4 axis wire EDM machining

- FASTTRIMSTEEL**
Automated generation of die forming trimming tools
- FASTELECTRODE**
Automated creation, documentation & machining of EDM sinking electrodes
- FASTJOINT**
Efficient design and administration of fasteners in CATIA
- CDI V5/CAA**
Secure and consistent management of all CATIA engineering data in SAP
