MWF-Bore

Database-driven bore generator for CATIA V5

- Enables to create complex multi-step holes (definition of chamfers, threads and grooves in every hole step) incl. any important manufacturing information
- Transfers directly all defined process-relevant information to the CAM module

CATIA MD2 •

–
–

MWF-Assembly

Comfortable loading, managing, positioning, installing, storing standard parts

- Allows to create screw- and pin connections in only a few steps
- Analyses the geometry for already existing connecting holes and creates missing holes

MWF-Drafting

Automatic drawing derivation of the holes created with MWF-Bore

- Automatically numbering of the holes and mapping of the coordinate axes
- Creation of hole tables with any manufacturing information (e. g., positions, threads, tolerances) and hole sketches incl. dimensioning parameters
