“Keep and share design history”

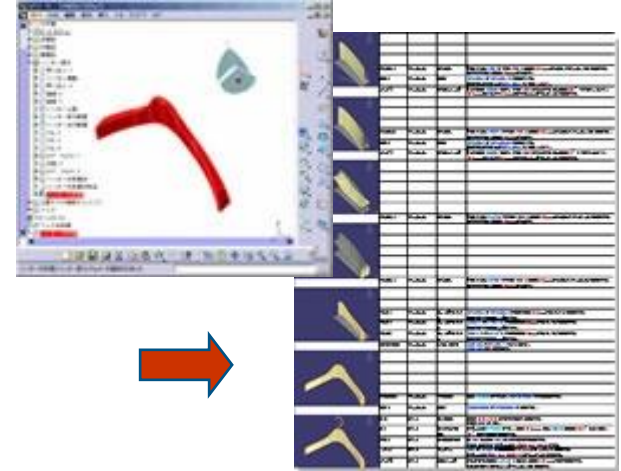

- **Maxis Cubic**

Helps CAD designers to document modeling creation processes from history trees of features

- Helps communicating modeling knowledge to other CAD designers
- Helps sharing the knowledge of modeling experts
- Checks irregular modeling process

Key features include :

- Convert the CATIA modeling creation processes into a text-based description in natural language
- Describe the detailed creation process
- Perform searches using free text queries
(e.g shape fillets with internal edge, corners which are generated from line.1, etc.)
- Create the correlation charts of Part Files
