- **iCPS/Designer - V5**
Helps engineers optimize the layup of composite parts
 - Layup method strategy definition
 - Continuous surface definition , surface updating
- **iCPS/NC Programmer and Analysis - V5**
Automates the manufacturing process of composite parts
 - Analysis of the manufacturability of a part
 - Ply generation, fiber paths deviation and curvature analysis
 - Link with analysis to automate the update of the FEA model
 - Definition of automated fiber placement operation, NC data generation

- **Ingersoll V6 Interface for AFP**
Automated Fiber Placement for composite part manufacturing
