SOLVE-IT®

- **CATVDA V5**

Exchange of CATIA 3D geometry data to other CAD systems and to NC, technical calculation and technical documentation

- Allows to transfer CATIA-Parts, CATIA-Products as well as individually selected parts of a model
- Enables the mapping of elements types which do not exactly correspond to any VDAFS 2.0 standard on replacement elements
- Provides various translation control options and settings for process launching & flow control
- Can be launched in batch mode or included into user defined interfaces for automated data exchange
