CYBERGLOVE SYSTEMS

TECHNOLOGY PARTNER

DASSAULT SYSTEMES

CyberGlove Systems

"Engaging the sense of touch"

- **Products: 3D data glove and hand-centric 3D motion capture**
  - **CyberGlove Systems,** data glove solution offering both kinesthetic force and vibrotactile feedback through their CyberTouch, CyberGrasp and CyberForce
  - **CyberGlove II,** the newest motion capture data glove, fully instrumented with up to 22 high-accuracy joint-angle measurements

- **Benefits**
  - **Immersion and Interaction:** Feel as being a part of a computer-generated artificial 3D world, directly interact with the virtual environment
  - **Motion Capture:** Allow industrial engineering customers to more quickly prototype and simulate in virtual reality
