

## “Enabling Better Design”

From mobile chipsets to complex GPU cluster solutions, NVIDIA helps solve visual computing challenges

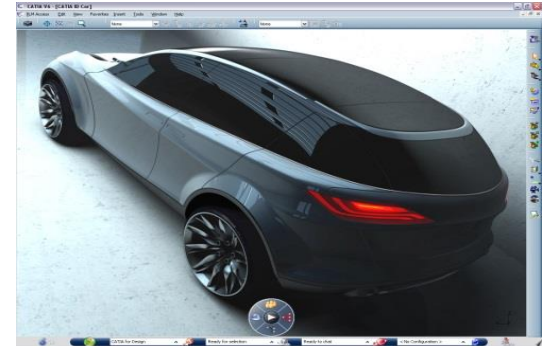

### • Products: GPUs

- **NVIDIA® Quadro®:** visualization solutions engineered for performance and reliability, including the industry leading Quadro K6000
- **NVIDIA® Tesla™:** high performance computing power for rapid simulation, accelerated rendering
- **NVIDIA® Maximus™:** multi-GPU configuration to enable real world materials as well as mechanical, fluid and structural dynamics during interactive design

### • Benefits

- **Faster time to market:** Interactive performance with complex 3D CAD models or with simulation; quickly create photorealistic images to enable rapid design iteration
- **Trusted solution for mission critical applications:** NVIDIA Quadro products provide industry leading reliability and are optimized for 3DS professional applications
- **Strategic partnership between Dassault and NVIDIA:** Close collaboration results in optimized graphics acceleration for enhanced workflow productivity to help users maintain competitiveness
