

“Get inside your 3D visualizations!”

- **Products: Immersive 3D displays**

- **VisDuo™**: General-purpose passive stereo display system that can be used to display 3D stereo applications
- **VisBox™**: Rear-projected immersive 3D display providing large stereo 3D imagery within a small footprint
- **VisCube™**: Affordable CAVE-like immersive virtual reality system

- **Benefits**

- Allows enhanced viewing and understanding of 3D content such as CATIA or 3DVIA Virtools models
- Enables collaborative design reviews of 3D models at **human scale**
- Improves group communication and decision making
