

3D SYSTEMS

3D Digital Design-to-Fabrication Solutions

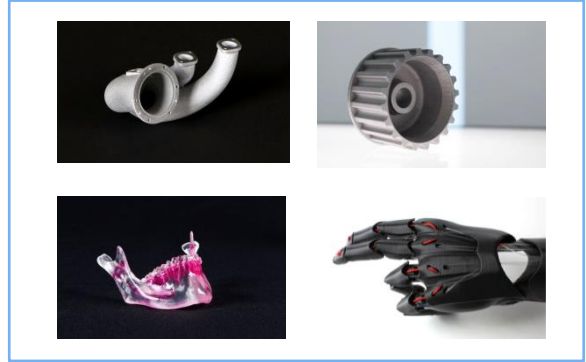

3DSYSTEMS®

- **Products: Consumer, Professional and Production 3D Printing**

- Industry's largest portfolio of 3D printing solutions powered by seven print engines and 120+ performance materials, including metals, engineering plastics and elastomers
- Solutions range from the affordable Cube® (\$999) to high-performance, fab-grade SLA, SLS and metal 3D printers
- Quickparts on-demand, cloud-based manufacturing service uses 3D printing and traditional methods for everything from one-off part orders to large-scale production runs

- **Benefits**

- Quickly produce durable, functional parts straight from CAD data for immediate end use, testing, concept presentation and more
- Reduce product design windows and costs, minimize tooling costs, accelerate time to market
- Free design from the constraints of traditional manufacturing and produce parts with unlimited complexity
