V5 Adopter

• CAIP – Computer Aided Inspection Planning

Validation of the geometry quality

CATIA

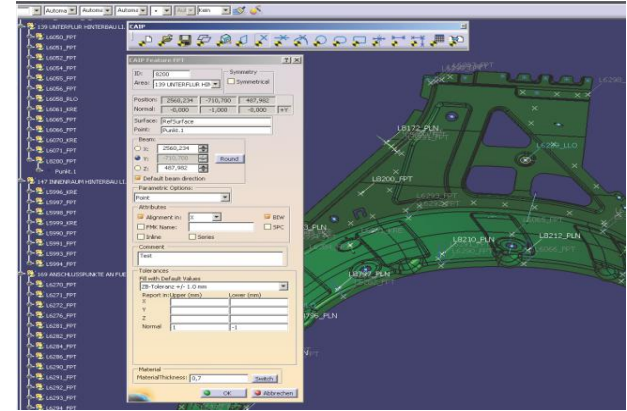

HD2

Efficiency

- Intuitive creation of measurement plans inside a CATIA 3D-model
- Automatic geometry identification
- Automatic update in case of part modification
- Symmetrical measurement planning across several parts, including plausibility check

Collaboration

- High configurability of interchange formats (such as I++, CSV ...)
- 100% ‘partner capable’ because of SOA
