 **MotionAnalysis**

“3D Passive Optical Motion Capture”

- **Products: 3D non-invasive motion capture systems**

- Sophisticated, accurate and repeatable, non-contact, 3D measurement and tracking technology
- 6DOF positional feedback to sub-millimetre accuracy and repeatability
- Real-time multi-user capability

- **Benefits**

In combination with CATI/DELMIA and 3DVIA

- **Create and manipulate** advanced, user-defined digital human manikins
- **Simulate** task activities in the process simulation environment in real-time
- **Analyse** worker processes early in the manufacturing & assembly lifecycle
